GENERAL REVIEW.

MR. RICHARD S. LYON, President of the Board of Trade of the City of Chicago.

SIR:—The year, notwithstanding the general commercial prosperity, was not one of special advantage to those engaged in handling breadstuffs and provisions. The pronounced improvement in the demand for manufactures almost everywhere apparent, resulting in materially increased profits to manufacturers and to dealers, has not correspondingly affected food products; consequently the business of the members of our exchange did not share to any appreciable extent in the prosperity which in other directions has so favorably accentuated the year. Still, indirectly and inevitably prices of breadstuffs will ultimately improve, if the general advance in prices continues, and that, as I shall presently show, in absolute harmony with the law of supply and demand. The conditions of trade in foodstuffs are in some and important respects decidedly different from those which obtain in other departments of business. Experience, in some instances dearly bought, has, during several years, taught merchants and manufacturers that stocks of goods in volume out of proper ratio to demand are inimical, if not destructive, to commercial and financial safety; and the remedy for commercial dullness and unprofitable business has been to a large degree in their own hands. However, of late years there has not been an excessive supply of manufactured goods. The husbandman and grain dealer on the contrary have no such control of the situation. The laws of vegetable growth operate independently of financial and commercial conditions; those laws can not be influenced, even in the slightest degree, in those vast agricultural countries that furnish the world's supply of grain. Again, the consumption of the chief cereals is not, as a rule, greater in so-called good times than in hard times; indeed, that consumption per capita is likely to be diminished in times of widespread prosperity, as during such times there is an increased demand for luxurious living. With the exception of positively poverty-stricken countries and peoples subsisting under most primitive conditions, the consumption of wheat per capita is largest where the mass of the inhabitants have comparatively limited means and are compelled to livé upon plain and cheap food, mostly upon wheat and rye bread, and vegetables. The crops of our own land were more than ample and the demand from the nature of the case, not having been increased, priceshave not improved and the activity has not been greater than during the preceding year when essentially the same relation of supply to the demand prevailed. It should be borne in mind, however, that when other lines of business were unprofitable the business in breadstuffs was profitable. We have experienced in years past no such depression, stagnation and disaster as havemarked many years in other departments of business. of business in grain and provisions is much more uniform and reliable and subject to very much less serious changes than that, for instance, in building material, boots, shoes, furniture, clothing, artistic wares, etc. While the prices of grain have not greatly advanced, they have given to the farmer a good profit. His financial condition is quite satisfactory and it may be correctly stated that the close of the year finds him in prosperous circum-This situation is an exceedingly hopeful one. agriculturalist is not by any means obliged to accept prices which are not satisfactory. He is more independent, financially and commercially than he has been for years. The prices now to be satisfactory to him must be higher than during the last few years because both his necessities and reasonable requirements cost more These conditions operate to decrease the availablethan formerly. supply of grain or to control it in view of remunerative prices. It is upon this theory, consistent with the law of supply and. demand, that we expect ere long that the farmer will participate in the good times equally with the manufacturer, dealer, merchant, banker and investor. It is high time that the farmer has his turn.

An advance of three cents a bushel upon the price of corn brings sixty million dollars into the lap of the agriculturist, on a crop of 2,000,000,000 bushels, or between twenty-five and twenty-six million dollars on the maize crops of the States of Illinois, Iowa, Missouri, Kansas, Nebraska and Indiana. What that means to the purchasing power of those states and what a corresponding advance in the price of the crop of oats, wheat, rye and barley adds to the resources of the great west, we may conceive. Such an increment to the funds, mainly of the Mississippi Valley and the Trans-Mississippi region, inevitably sets in motion almost countless industries from one end of the land to the other.

Our inland and foreign trade show a substantial increase over that of the preceding year; labor has been profitably employed; new enterprises have been begun and prosecuted and old ones revived, all of which have resulted in that general circulation of money which distributes wealth and permits all a share in the blessings of prosperity.

THE GRAIN CROPS OF THE UNITED STATES.

The latest official estimates of the United States Department of Agriculture of the chief grain crops of the country, comprising wheat, corn, oats, rye and barley, aggregated 3,518,968,796 bushels, produced on 157,580,020 acres, valued at \$1,179,731,716, as against 3,411,689,787 bushels, produced on 151,780,501 acres, valued at \$1,166,138,821 during the year 1898, and 3,225,933,361 bushels, 149,713,169 acres and \$1,114,976,578, respectively, during the year 1897, and 3,512,970,185 bushels, 147,993,527 acres and \$966,546,549, respectively, during the year 1896.

The crop of wheat was 127,844,859 bushels less than that of 1898, 17,154,678 bushels in excess of that of 1897 and 119,-619,500 bushels larger than the crop of 1896. The average crop of wheat for ten years, from 1890 to 1899, inclusive, is 503,077,915 bushels, so that the present crop is almost 44,000,000 bushels above that average. The value of the crop of wheat of 1899, as estimated by the United States Department of Agriculture, was \$319,545,259, as against, \$392,770,320, the value of the wheat crop of 1898, and \$428,547,121, the value of the crop of wheat of 1897.

The corn crop of 1899 was estimated at 2,078,143,933 bushels and its value at \$629,210,110, showing an excess in value of \$77,-186,682 and of 153,959,273 bushels in volume over that of 1898. The average corn crop for the years from 1895 to 1899, inclusive, was 2,068,062,054 bushels, which is about the same in volume as the crop of last year. The valuation of the crop of 1899 was largely in excess of that of any year embraced in the five years mentioned. This crop brings a vast amount of wealth to the nation, sustaining varied industries, feeding great transportation lines in a variety of forms in all parts of the country. It prepares the finest meat food in the world and raises for market about 50,000,000 of swine annually on the farms of the United States. Extensive packing establishments, the outgrowth of this crop, are established in many of our commercial centers, profitably employing an army of workmen and furnishing the tables of the poor and the rich, the peasant and the prince, the

farmer and the merchant, very materially contributing to our inland and foreign trade. There is not a market in the world that does not carry a stock of American pork. It is the most widely distributed of It may be found in the cabin, palace and commisall meat foods. sariat, on ships and on shore. We exported during the calendar year 1899, 206,135,233 bushels of corn and about the same quantity during the year 1898. Our exports of corn during 1899 brought into our hands in return \$82,728,589. This splendid crop is growing every year in importance and is being more and more appreciated as a palatable and nutritious food both for man and The principal corn producing states are Illinois, Iowa, Kansas, Nebraska, Missouri and Indiana, lying in what is designated as the great corn belt. It is a habitat of nearly every state and territory, though the shallow and niggardly soil of New England yields only a small supply. Its consumption in those sterile states is large and an immense volume of it is thither shipped by lake, rail and canal transportation each year. The quality of last year's We shipped out of Chicago about 120,000,000 crop was excellent. bushels, 63,000,000 bushels of which went by the Great Lakes, mostly to Buffalo and from thence scattered by rail along the middle and northern coast states. The chief maize producing countries are, besides the United States, Austria-Hungary, Argentina, Italy, Roumania, Russia, Egypt, Canada, France and Mexico. country produces about 84 per cent. of the world's crop.

In Europe there is a corn belt as clearly defined as the corn belt of the United States. It extends from west to east entirely across the continent; and its extent from north to south is comprised between a line along about the 48th parallel of north latitude through France, then deflecting to about the 50th parallel through the rest of Europe, and the shores of the Mediterranean and Black Sea. The annual production of this belt ranges ordinarily from about 420,000,000 to 470,000,000 bushels. The annual consumption of corn in Europe amounts to between 600,000,000 and 700,000,000 bushels.

The crop of oats aggregated 796,177,713 bushels, valued at \$198,167,975, as against 730,906,643 bushels, valued at \$186,405,364 during 1898. The largest crop of this grain ever raised in this country was that of 1895 and aggregated 824,443,537 bushels, but was about \$35,000,000 less in valuation than the crop of last year.

The estimate of the Hungarian Ministry of Agriculture of the world's production of oats for 1899 is 899,350,000 to 918,850,000 hectoliters, or 2,552,100,000 to 2,607,500,000 bushels; and of the world's consumption 925,250,000 to 963,750,000 hectoliters or 2,625,600,000 to 2,734,900,000 bushels.

The crop of barley aggregated 73,381,563 bushels grown on 2,878,229 acres, valued at \$29,594,254, as against 55,792,257 bushels grown on 2,583,125 acres, valued at \$23,064,359 in 1898, and 66,685,127 bushels grown on 2,719,116 acres valued at \$25,142,139 in 1897, and 69,695,223 bushels grown on 2,950,539 acres, valued at \$22,491,241 in the year 1896.

California is the largest barley producing state, and yielded last year of this grain 22,239,776 bushels. Iowa comes next with 12,011,896 bushels; then follow Minnesota, Wisconsin, the Dakotas with about 8,000,000 bushels each.

The crop of rye aggregated 23,961,741 bushels, grown on 1,659,308 acres, valued at \$12,214,118. The crop was about 2,000,000 bushels less than that of the previous year, but its valuation was about \$400,000 more. This crop averages about 26,000,000 bushels in volume.

The crop of hay aggregated 56,655,756 tons grown on 41,328,462 acres, valued at \$411,926,187, as against 66,376,920 tons valued at \$398,060,647 in 1898, 60,664,876 tons grown on 42,426,770 acres, valued at \$401,390,728 during 1897, and 59,282,158 tons produced on 43,083,134 acres, valued at \$388,145,614 during the year 1896. The principal hay producing states are Ohio, Michigan, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri and Kansas.

The crop of white potatoes aggregated 228,783,232 bushels dug out of 2,581,353 acres of land, valued at \$80,328,832 against 192,306,338 bushels, valued at \$79,574,772 in 1898, 164,015,964 bushels cultivated on 2,534,577 acres, valued at \$89,643,059, in the year 1897. The principal potato producing states are New York, Pennsylvania, Ohio, Michigan, Illinois, Wisconsin, Minnesota, Iowa, Nebraska.

The officially estimated farm value of the chief crops, comprising wheat, corn, oats, rye, hay and potatoes, as computed by the United States Department of Agriculture, was \$1,689,986,735, as against \$1,643,774,240 in 1898, \$1,606,010,365 in 1897, and \$1,426,874,513 in 1896.

On pages 189 and 190 of this report may be examined statements of the grain crops of the world, classifying the chief importing and chief exporting countries, and also giving interesting and instructive comparisons.

The cotton crop of 1899 aggregated 11,274,840 bales, or 5,794,767,917 pounds, valued on the farm at \$260,223,000, as against 11,199,994, bales, or 5,677,259,827 pounds, valued on the farm at \$294,709,000, in 1898. About 32 per cent of this crop is taken by United States mills. The farm value of this crop is less than one-half the farm value of our corn crop and about \$60,000,000 less than that of our wheat crop.

ACREAGE, PRODUCTION, VALUE AND DISPOSITION OF THE WHEAT CROP OF THE UNITED STATES IN 1899, BY STATES.

Furnished by John Hyde, Statistician, Department of Agriculture.

The Statistician of the Department of Agriculture has completed his annual estimate of the number and value of live stock on farms. Returns from more than 50,000 correspondents show that on January 1 there were on the farms of the United States 13,537,524 horses, 2,086,027 mules, 16,292,360 milch cows, 27,610,054 other cattle, and 41,883,065 sheep. This is a decrease of 127,783 in the number of horses, of 48,186 in that of mules, and of 384,171 in that of cattle other than milch cows. On the other hand, it is an increase of 302,245 in the number of milch cows, and of 2,768,612 in that of sheep.

The Department has made no estimate of the number of swine but will await the enumeration to be made by the U. S. Census in June next.

There has been an increase in value during the year averaging \$7.21 per head in the case of horses, \$8.60 per head in that of mules, \$1.94 per head in that of milch cows, \$2.18 per head in that of other cattle, and 18 cents per head in that of sheep. This represents a total increase in value during the year of nearly \$216,000,000, exclusive of a manifestly considerable but not definitely ascertained increase in the value of swine. The total increase in the value of the farm animals of the United States during the last three years exceeds \$570,000,000. Farm horses have increased in value \$151,000,000, mules \$19,000,000, milch cows \$146,000,000, other cattle \$181,000,000, sheep \$56,000,000, and swine about \$20,000,000.

The following is a statement of the great wheat producing portions of the world and of the months of their respective harvests:

January-Australia, Argentine, Chili and New Zealand.

February and March—East India and Upper Egypt.

April—Asia Minor, Cuba, Cyprus, India, Lower Egypt, Mexico, Persia and Syria.

May—Algeria, Central Asia, China, Florida, Japan, Morocco and Texas.

June—Alabama, Arkansas, California, Carolina, Colorado, Georgia, Greece, Italy, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Oregon, Portugal, South of France, Spain, Tennessee, Turkey, Utah and Virginia.

July—Austro-Hungary, Bulgaria, France, Germany, Illinois, Indiana, Iowa, Michigan, Minnesota, New York, Nebraska, Ohio, Roumania, South of Russia, Switzerland, South of England, Upper Canada and New England.

August—Belgium, Colombia, Denmark, Great Britain, Holland, Lower Canada, Manitoba, Poland, North and South Dakota.

September and October—Norway, North of Russia, Scotland and Sweden.

November—Peru and South Africa.

December—Burmah.

FOREIGN COMMERCE OF THE UNITED STATES.

The value of our imports of merchandise during the fiscal year ended June 30, 1899, was \$697,148,489, and for the calendar year \$798,845,571; of gold for the fiscal year, \$88,954,603; of silver, \$30,675,056; and for the calendar year, of gold \$51,194,964, of silver \$30,844,981. The larger part of our silver came from Mexico and of gold from British Australasia. The value of our exports of merchandise during the fiscal year ended June 30, 1899, was \$1,227,023,302 and for the calendar year \$1,275,499,671. Our exports of gold for the fiscal year ended June 30, 1899, amount to \$37,522,086; of silver \$56,319,055. Our exports of gold for the calendar year were valued at \$45,379,411; of silver \$53,461,-737.

The value of our foreign trade, including exports and imports of merchandise, and gold and silver coin and bullion covering the fiscal year ended June 30, 1899, was \$2,137,642,591.

Of agricultural products the exports for the fiscal year amounted in value to \$784,989.087, as against \$853,989,687 in 1898, and \$683,471,139 in 1897. The products of agriculture exported during 1899 constituted 65.20 per cent. of our total exports. Our exports of corn aggregated 174,089,094 bushels, valued at \$68,977,448, as against 208,744,939 bushels, valued at \$74,196,850, shipped during the year 1898. The total value of our exports of breadstuffs for the year was \$273,999,699, against \$333,897,119 exported during the year 1898, and \$197,857,219 during the year 1897.

Our exports of wheat during the fiscal year ended June 30, 1899, aggregated 139,432,815 bushels, valued at \$104,269,169, as against 148,231,261 bushels, valued at \$145,684,659, exported during the preceding fiscal year, and 79,562,020 bushels, valued at \$59,920,178, during the year 1897. Of the quantity of wheat exported during 1899, 74,613,304 bushels were shipped to the United Kingdom, 18,455,133 bushels to the Netherlands, 15,718,879 bushels to Belgium, 10,311,450 bushels to Germany and 2,232,190 bushels to France. The total exports of wheat during the calendar year aggregated 109,635,161 bushels valued at \$81,447,405, as against 148,053,394 bushels, valued at \$129,706,847 exported during the preceding year and 108,671,332 bushels, valued at \$98,533,543, exported during the calendar year 1897.

We exported of raw cotton during the year ended June 30, 1899, 7,373,382 bales, weighing 3,787,919,122 pounds, valued at \$210,089,576, as against 7,581,004 bales, weighing 3,850,264,295 pounds, valued at \$230,442,215 during 1898.

The value of our total exportation of meats and dairy products grouped under the general phrase "provisions," amounted to \$175,508,608, as against \$167,340,960 in 1898, and \$138,652,735 in 1897.

The value of our great agricultural products exported during the fiscal year ended June 30, 1899, comprising breadstuffs, provisions and cotton, were valued at \$659,597,883—the value of these articles exported from the United States during the corresponding period in 1897–98, or during the fiscal year ended June 30, 1898, was \$731,680,294. The excess of exports over imports during the fiscal year ended June 30, 1899, was \$529,874,813, as against \$615,432,676 during the preceding fiscal year. The value of domestic merchandise exported during the fiscal year ended June 30, 1899, amounted to \$1,203,931,222, as against \$1,210,-291,913, during 1898; \$1,032,007,603 during 1897; \$863,200,487 during 1896; \$793,392,590 during 1895 and \$869,204,937 during the year 1894.

The total value of foreign merchandise exported during the fiscal year was \$23,092,080, as against \$21,190,417 during 1898. Of our exports of domestic merchandise, \$75,500,650 in value was carried in American bottoms, while \$1,051,462,714 in value was carried in foreign bottoms, the British and German vessels carrying in value \$893,195,088. The value of the quantity of our exports of domestic merchandise, carried in cars and other land vehicles, was \$77,159,770.

The percentage of increase in American steam vessels during the last twenty-five years is very much less than is that of the steam vessels of any other nation, less even than is that of Spain. Germany has added very largely to her steam fleet; likewise France, Holland and Russia, but Norway has outstripped all other powers, it having increased its steam craft 1411 per cent. from 1873 to 1895. The United States increased her steam vessels during that period 189 per cent., and Great Britain 311 per cent. Norway being principally a maritime nation and presenting few opportunities to her people for employment on land, finds no

difficulty in manning her ships with her own men at comparatively low wages, hence she can buy vessels in Great Britain, man them with her own hardy sailors and successfully compete for the world's carrying trade. Even Japan, which a few years ago was so small with respect to her steam tonnage as to be included under the head of "Miscellaneous," last year built steam vessels of 6,000 tons and is classed sixth in the list of nations classified according to steam The United States has been strangely apathetic regardtonnage. ing her ocean carrying trade; so poorly was it equipped in this regard during our war with Spain that we were obliged to buy transports at high prices of other nations to carry our troops and coal across the seas. A subsidy bill to build up the American ocean carrying trade, introduced by Senator Frye, is pending in the Senate and its speedy enactment is advocated by this board and was supported by its delegation to the annual meeting of the National Board of Trade, held in Washington, D. C., in January, 1900, sage of the bill was urged by the national organization. millions of money every year into foreign markets to support for-Why send America's money to build up and suseign industries? tain foreign ship yards? Why suffer our own merchant marine to stand in such unfavorable contrast with that of any other of the great or even second class nations of the world? Is it because other nations will carry our sea borne goods at a cheaper rate than we care to charge for such service? Then let the government There are larger questions involved than subsidize that service. the one of mere freight rates—American seamanship as related to national defence, American steel and iron mills, American ship yards, wages for our own skilled workers in wood, brass, iron, glass, steel, etc.: these and all that they signify to a distribution of wealth and to the general prosperity, to the public defense, and as to whether the American ensign should float above American merchandise upon the high seas—these are the great considerations in the discussion of a subsidy bill in aid of American shipping. the year 1899, 8.9 per cent. of the foreign carrying trade of the United States was carried in American vessels. The value of that trade was \$160,612,206 and that carried in foreign vessels \$1,646,263,857. The value of our export trade carried in American vessels was \$78,562,088, or 6.9 per cent. The value of that export trade carried in foreign vessels was \$1,064,590,307. value of our import trade carried in American vessels was \$82,-

015,118 or 12.4 per cent., and the value of that trade carried in foreign vessels was \$581,673,550. Of the foreign tonnage entered and cleared at seaports of the United States from and to foreign countries, 25,057,576 tons were British tonnage, 2,838,847 tons Norwegian and Swedish, 4,614,545 tons were German, 869,251 tons were French, 463,242 tons were Spanish, 550,555 tons were Italian, 915,196 tons were Dutch; and the total foreign tonnage was 37,344,878 tons of a grand total of 44,140,890 tons. The number of sailing and steam vessels of the merchant marine of the United States at the close of the last fiscal year, was 22,728, representing a tonnage of 4,864,238 tons. The number of tons engaged in coastwise trade was 3,965,313 tons; in foreign trade 837,229 tons; in whale fisheries, 11,017 tons, and in cod and mackerel fisheries, 50,679 tons.

The total exports of wheat flour during the last fiscal year aggregated 18,485,690 barrels, valued at \$73,093,870, as against 15,349,943 barrels, valued at \$69,263,718, exported during the preceding year. During the calendar year ended December 31, 1899, our exports of wheat flour aggregated 18,717,161 barrels, valued at \$70,082,417. During the fiscal year of our exports of wheat flour, 10,233,360 barrels were shipped to the United Kingdom, 1,377,544 barrels to the Netherlands, 502,874 barrels to Germany, 1,959 barrels to France, 1,351,131 barrels to the West Indies, 1,299,923 barrels to South America and 1,221,314 barrels to Hongkong.

The exports of corn during the year ended, December 31, 1899, aggregated 206,135,233 bushels, valued at \$82,728,589, and during the fiscal year ended June 30, 1899, 174,089,094 bushels, valued at \$68,977,448. Of the quantity exported during the last fiscal year, 7,383,260 bushels were shipped to Belgium, 14,260,591 bushels to Denmark, 5,236,194 bushels to France, 34,605,373 bushels to Germany, 18,540,911 bushels to the Netherlands and 68,607,317 to the United Kingdom. The following pertinent observations regarding our corn export trade is quoted from the report of Mr. O. P. Austin, Chief of Bureau of Statistics of the United States Treasury Department:

"While the corn crop has always been considerably larger than the wheat crop, the export of that article has, until recently, assumed no such proportions as that of wheat. The cause of this lies in the greater portability of wheat, in other words, to the fact that it has a greater value per given bulk than corn, and also to the fact that a very decided prejudice exists in many parts of Europe against the use of corn as a human-food product.

"It is true that, to a certain extent, corn and corn meal have been articles of export since colonial days, but until quite recently this export was hampered by many unfavorable conditions and failed There existed in Europe a popular prejudice against corn as food, and it has even yet failed to enter largely into the daily consumption of the masses in European countries. The tendency of the grain to absorb water and to mold, or be otherwise injured, rendered its export, to any large extent, impracticable, and it was not until recently that improved methods of handling and drying, and the use of steamers instead of sail vessels, rendered the export of corn on a large scale feasible. During the fifty years, 1790 to 1839, there was but little more corn exported than during the single year 1877, and only one-third as much as was exported during the single year 1898, while the total export for the eighty years, 1790 to 1869, was little greater than that of the single year 1898.

"The proportion of corn exported to corn produced has gradually increased. From 1867 to 1872 it was only 1.54 per cent.; from 1873 to 1878, 4.51 per cent.; from 1879 to 1883, 4.90 per cent.; from 1884 to 1888, 2.70 per cent.; from 1889 to 1893, 3.44 per cent., and from 1894 to 1898, 6.03 per cent. The actual amounts exported show a still more remarkable increase, amounting to an annual average export during each of these periods of 14,200,000, 52,800,000, 73,400,000, 46,200,000, 66,000,000, and 117,400,000 bushels.

"There are recent indications of a continued large increase in the export of corn. In 1898, for the first time, there were more bushels of corn exported than of wheat and flour combined (one barrel of flour being considered equivalent to $4\frac{1}{2}$ bushels of wheat). This relation between wheat and flour was not maintained during the fiscal year .1899, but the exportation, though lessened, was still considerable, falling but little below that of 1897, and amounting to 174,089,094 bushels of corn and 791,488 barrels of corn meal. The exportation was to the same countries and in about the same proportion as in the case of wheat, with the exception that Germany receives a far larger percentage of our exported corn (19.9 per cent.) than of our exported wheat (7.4 per cent.) or of our wheat (flour 0.3 per cent.)"

The quantity of oats exported during the fiscal year ended June 30, 1899, aggregated 30,309,680 bushels, valued at \$9,787,540, as against 69,130,288 bushels, valued at \$20,632,914 exported during the preceding year, and 35,096,736 bushels, valued at \$8,756,207 exported during the fiscal year ended June 30, 1897. Of oatmeal we exported during the fiscal year last past, 58,042,505 pounds, valued at \$1,295,988, as against 85,500,350 pounds, valued at \$1,757,978 exported during the preceding year.

The volume of lard exported during the last fiscal year aggregated 711,250,851 pounds, valued at \$42,208,462, as against 709,344,045 pounds, valued at \$39,710,672 exported during the year ended June 30, 1898, and 568,315,610 pounds, valued at \$29,126,485 exported during the fiscal year of 1896–97. During the fiscal year last past we exported 204,645,770 pounds to the United Kingdom, 229,230,175 pounds to Germany, 32,312,597 pounds to France, 27,291,504 pounds to Cuba, and about 29,000,000 pounds to South America.

Our exports of bacon during the fiscal year ended June 30, 1899, aggregated 562,651,480 pounds, valued at \$41,557,067, as against 650,108,933 pounds, valued at \$46,380,918 exported during the year ended June 30, 1898. During the year ended December 31, 1899, our exports of bacon aggregated 558,005,388 pounds, valued at \$41,008,919, as against 618,683,235 pounds, valued at \$45,786,045 exported during the preceding calendar year. Of our exports of bacon during the last fiscal year, 395,474,204 pounds were shipped to the United Kingdom, 36,151,678 pounds to Germany, 12,366,110 pounds to France and 88,521,122 pounds to other parts of Europe. Cuba took 11,353,301 pounds and Brazil 6,010,051 pounds.

Of hams, our exports during the year ended June 30, 1899, aggregated 225,846,750 pounds, valued at \$20,774,084, as against 200,185,861 pounds, valued at \$18,987,525 exported during the preceding fiscal year. The United Kingdom and the Continent took the bulk of this exportation, viz.: 209,000,000 pounds out of about 226,000,000 pounds. Cuba took 6,229,486 pounds during the fiscal year last passed.

Our exports of pork during the year ended June 30, 1899, aggregated, including fresh and salted, 178,507,564 pounds, valued at \$10,639,727, as against 100,357,363 pounds, valued at \$5,722,036

exported during the year immediately preceding. Again, in regard to pork, most of this article shipped to foreign countries goes to the United Kingdom and the Continent. Quite an extensive trade in American pork is done with the West Indies.

The value of agricultural implements exported during the fiscal year, amounted to \$12,432,197, as against \$7,119,732 in the year 1898, and \$5,240,686 in 1897. Shipments to Argentina very largely increased during the last year, amounting in value to \$1,679,019.

The following official statement is submitted, showing the value of various articles of provisions and of dairy products exported from the United States from 1860 to 1899, inclusive:

The value of gold coin and bullion exported during the fiscal year ended June 30, 1899, was \$37,522,086, and of that imported, \$88,954,603, as against \$15,406,391 and \$120,391,674, respectively, exported during the preceding year. The value of silver coin and bullion exported during the same period was \$65,319,055, and of that imported \$30,675,056, as against \$55,105,239 and \$30,027,781, respectively, exported during the preceding year.

When Jackson purchased Louisiana in 1804, the value of our exports amounted to fifty-five million dollars (\$55,000,000). 1846, when we acquired California, and the Bear flag gave way to the Stars and Stripes, our exports increased to about one hundred and ten million dollars (\$110,000,000), showing an increase in 43 years of fifty-five million dollars (\$55,000,000). During the last fiscal year our exports amounted in value to one thousand, two hundred and twenty-seven million dollars (\$1,227,000,000), showing in 53 years an increase of more than one thousand million dollars (\$1,000,000,000). Our expansion of commerce keeps pace with our expansion of empire. Within a century our territory increased from 327,000 square miles to 3,000,000 square miles, exclusive of the islands taken from Spain. As fast as our flag is advanced has our trade moved promptly on. Commerce is always alert and keeps close to the national ensign, because it knows that over whatever land, either in the eastern or western hemisphere, that emblem in sovereignty waves, there it will remain and there it will protect. No narrow policy, no laggard patriotism will haul it down. Our national domain has grown from a narrow strip of territory along the Atlantic coast to an empire stretching from ocean to ocean and from the great lakes to the gulf; to the Hawaiian and Philippine Islands; to Cuba and Porto Rico.

As our possessions have enlarged, our national policy and ideas of government have broadened and there is developed a new and aggressive genius for trade. It is the power and the privilege of the American people to christianize and to civilize wherever in the providence of God they may go and wherever they may remain. Our interstate commerce has wonderfully developed, and of late years, especially, the mercantile spirit has so stimulated our international commercial relations that our exports have enormously increased.

A careful study of our foreign commerce shows a more rapid growth in our sales than in our purchases, in all parts of the world; and the statistical returns of the principal foreign countries show that their purchases from us are constantly forming a larger percentage of their growing imports, while their sales to us form a constantly decreasing percentage of their total exports. These conclusions are especially noticeable in our commerce with the United Kingdom, Germany, Netherlands, China and with Japan. From this last named country our imports in 1870 were valued at \$3,052,026, and in 1899, \$26,716,814, an increase of 775 per cent., while our exports to Japan which in 1870 were valued at \$571,186, were in 1899 valued at \$17,264,688, showing an increase of 2,923 per cent.

We stand at an open door to the great eastern empires, presenting opportunities for the extension of our foreign commerce such as were never presented to any other nation. No country is so thoroughly provided with valuable raw material or better equipped for increasing and improving its varied products, or furnished with greater skill or with finer mechanical appliances to adapt those products in style and quality to any and every demand, as is the United States. We are realizing to a much greater extent than formerly, that the sale and exportation of raw material belong to primitive commercial conditions and to ordinary commercial intelligence and proficiency. In proportion as intelligence is woven into raw material, shall we furnish that with which the markets of the world are not even yet over-stocked and hence export and sell that which pays a greater profit than is derived from the sale of rude or common products—the result of comparatively unenlightened and unskilled labor. It should be borne in mind that by incorporating skilled labor and brains into the forms in which our products are offered for exportation we shall increase the value of our exports in far greater proportion than by increasing the volume of the exportation of raw material. By selling the finished product in countless forms of beauty and utility we avoid coming into competition with low priced and degraded labor and compete for commercial supremacy upon a high and an advanced plane, upon which are based enlightened requirements of living. If our industries and our commerce do not lead to such results, they have no part in the improvement and advance of the race, no share in arts and sciences, in refinement and education, nor in promoting that intercourse of mankind which inspires emulation and leads to excellence in all the walks of life.

CHICAGO.

The receipt of grain and of flour in its grain equivalent, during the year 1899, aggregated 320,670,440 bushels, as against 320,436,357 bushels during 1898; 296,767,115 bushels during 1897; 253,802,134 bushels during 1896; 189,432,819 bushels during 1895; 187,553,469 bushels during 1894; 246,972,966 bushels during 1893 and 255,832,556 bushels during 1892.

The shipment of grain and of flour in its grain equivalent, aggregated during the year, 246,369,099 bushels, as against 287,403,904 bushels shipped during the year 1898; 252,624,402 bushels during 1897; 219,710,781 bushels during 1896; 171,464,137 bushels during 1895; 148,638,822 bushels during 1894; 198,791,216 bushels during 1893 and 216,182,008 bushels during the year 1892.

The receipts of wheat during the year aggregated, 30,971,547 bushels, against 35,741,556 bushels in 1898; 28,087,147 bushels during 1897; 19,933,402 bushels during 1896; 20,637,642 bushels during 1895; 25,665,902 bushels during 1894; 35,355,101 bushels during 1893, and 50,234,556 bushels during 1892. The shipments during the year aggregated 10,784,168 bushels, as against 38,094,894 bushels during 1898; 26,669,466 bushels during 1897; 25,888,647 bushels during 1896; 22,775,780 bushels during 1895; 18,213,443 bushels during 1894; 24,715,738 bushels during 1893, and 43,833,795 bushels during the year 1892. Of the volume of wheat shipped during last year, 5,185,423 went out by the lakes, most of which found its way to destination via the Erie Canal.

The receipts of corn during the year aggregated 133,776,350 bushels—the largest volume of receipts of corn in the history of the trade—against 127,426,374 bushels received during 1898; 116,747,389 bushels during 1897; 92,722,348 bushels during 1896; 59,527,718 bushels during 1895; 64,951,815 bushels during 1894; 91,255,154 bushels during 1893, and 78,510,385 bushels received during the year 1892. The Chicago & North-Western Railway brought in 29,120,322 bushels, outstripping every other line. The Chicago, Burlington & Quincy Railroad brought in 27,223,100 bushels, the Chicago, Rock Island & Pacific Railway, 20,878,250 bushels, the Illinois Central, 17,316,050 bushels and the Chicago, Milwaukee & St. Paul Railway, 11,672,900 bushels. These great

lines of railway without interruption dispatch freight trains loaded with grain of all kinds from vast regions of unexampled fertility to distributive centers in different portions of the west, and carry back to those regions goods of all kinds to meet the wants of thriving towns in that wonderful corn belt whose prolific acres teem with constantly renewing wealth and offer to the industrious and ambitious a more than regal hospitality. The shipments of corn during the year aggregated 116,552,096 bushels, as against 130,397,681 bushels shipped during 1898; 97,456,807 bushels during 1897; 87,713,321 bushels during 1896; 59,964,265 bushels during 1895; 54,528,482 bushels during 1894; 78,919,781 bushels during 1893, and 66,104,220 bushels shipped during the year 1892.

The receipts of oats during the year aggregated 110,775,732 bushels-almost identical in quantity with the receipts during 1898; the receipts during the year 1897 aggregated 118,086,662 during 1896, 109,725,689 bushels; during 1895, bushels; 79,890,792 bushels; during 1894, 63,144,885 bushels; during 1893, 84,289,886 bushels; and during 1892, 79,827,985 bushels. Of the total volume of receipts during the year 22,146,540 bushels arrived via the Chicago & North-Western Railway, 17,431,650 bushels via Chicago, Burlington & Quincy Railroad, 16,829,750 bushels via Illinois Central Railroad, 15,319,410 bushels via Chicago, Milwaukee & St. Paul Railway and 14,519,800 bushels via Chicago, Rock Island & Pacific Railway. The Chicago & Alton Railroad, the Chicago & Eastern Illinois Railroad, the Wabash Railroad, the Chicago Great Western Railway and the Atchison, Topeka & Santa Fe Railroad brought in about 4,000,000 bushels each. The shipment of oats during the year aggregated 85,982,204 bushels, as against 85,057,636 bushels shipped during the year 1898; 104,666,956 bushels during the year 1897; 82,119,852 bushels during 1896; 66,839,956 bushels during 1895; 50,376,089 bushels during 1894; 67,129,119 bushels during 1893; 67,332,322 bushels during 1892 and 68,771,614 bushels shipped during the Of the total quantity shipped during the year but 16,883,801 bushels were shipped by lake, principally to Sarnia, Port Huron, Ogdensburg and Depot Harbor and Prescott; the larger part went out by rail, showing that the domestic markets are the chief customers for this grain, and that it is very generally distributed throughout the eastern states. The city consumption was quite extensive, it being last year about 24,000,000 bushels.

The number of cars of grain inspected in Chicago during the vear 1899, was 291,989, as against 322,914 cars during 1898, 331,991 during 1897, 295,138 during 1896, 222,960 during 1895, and 204,408 during 1894. The volume of grain received by lake and canal was 4,937,374 bushels; 4,741,869 bushels during 1898, 7,091,160 bushels during 1897, 3,944,814 bushels during 1896, 4,294,138 bushels during 1895, and 2,270,931 bushels during 1894. The week of the largest receipts of flour, in its wheat equivalent, and grain was that which closed October 7th, when 10,049,874 bushels were received, 5,180,368 bushels being of corn, 2,424,194 bushels being of oats, 971,633 bushels being of wheat, and 975,599 bushels being of barley. During the month of October our grain receipts aggregated 34,523,024 bushels. The week of the largest shipments of flour, in its wheat equivalent, and grain was that which closed April 29th, when 8,429,208 bushels were shipped, 4,225,787 bushels being of corn, 3,146,660 bushels being of oats, and 561,272 bushels being of wheat. During the month of April our shipments of grain and of flour, in its wheat equivalent, aggregated 18,398,774 bushels. The shipments of flour were quite heavy from March 11th to April 15th, inclusive, aggregating 747,488 barrels. During the month of January we shipped 956,993 barrels of flour. The quantity of grain stored in warehouses of "Class A" elevators or warehouses so designated under the Railroad and Warehouse Law of the State of Illinois, at the close of the year aggregated 21,642,097 bushels, as against 11,706,912 bushels upon the corresponding date of the preceding year, 27,902,857 bushels of 1897, 24,868,433 bushels of 1896, and 22,920,903 bushels of 1895. the 30th day of December, 1899, there were reported in warehouses of "Class A," 16,806,273 bushels of wheat, 2,994,801 bushels of corn, 1,543,290 bushels of oats; 228,929 bushels of rye, and 68,786 bushels of barley. Upon the corresponding date in 1898, there were in regular warehouses, 3,611,744 bushels of wheat, 5,706,415 bushels of corn, 1,419,771 bushels of oats, 434,766 bushels of rye, and 534,216 bushels of barley. On the corresponding date of the year 1897, there were stored in such warehouses, 9,703,884 bushels of wheat, 15,273,132 bushels of corn, 1,515,435 bushels of oats, and on December 26, 1896, there were in such storage 13,355,308 bushels of wheat, 5,567,305 bushels of corn, 4.773,557 bushels of oats, 1,076,720 bushels of rye and 95,543 bushels of barley.

The receipts of grass seed, including timothy, clover, hungarian

millet, etc., during the year, aggregated 84,225,909 pounds and shipments 76,079,526 pounds, as against 97,039,279 pounds received and 78,764,646 pounds shipped during the year 1898; 79,071,857 pounds and 87,840,334 pounds, respectively, during the year 1897; 83,577,243 pounds and 92,212,310 pounds, respectively, during the year 1896, and 63,868,526 pounds and 65,567,528 pounds, respectively, during the year 1895.

The receipts of flaxseed during the year last passed, aggregated 6,616,626 bushels as against 5,481,173 bushels received during 1898, 4,976,209 bushels during 1897, 10,299,525 bushels during 1896, and 8,525,237 bushels during 1895. The shipments during the year 1899 aggregated 3,093,943 bushels, as against 3,366,739 bushels during 1898, 2,859,493 bushels during 1897, 5,734,654 bushels during 1896, 4,726,818 bushels during 1895 and 2,353,757 bushels during 1894.

The receipts of lumber during the year last passed, aggregated 1,692,581,000 feet and shipments 736,701,000 feet, as against 1,556,647,000 feet and 691,844,000 feet, respectively, during the year 1898; 1,406,580,000 feet and 574,743,000 feet, respectively, during the year 1897; 1,286,643,000 feet and 509,920,000 feet, respectively, during the year 1896; 1,638,130,000 feet and 773,-983,000 feet, respectively, during the year 1895, and 1,562,527,000 feet and 632,069,000 feet, respectively, during the year 1894. received during the year 1899, 350,121,000 shingles and shipped 236,920,000 shingles, as against 293,151,000 and 267,920,000, respectively, during the year 1898. Upon page 98 of the statistical portion of this volume may be seen a detailed statement of the receipts and shipments of lumber and shingles, showing the railway lines on which received and those over which shipped; also may be seen a statement showing the stock on hand in this city, of lumber and timber, shingles, laths, pickets and cedar posts for a series of years. On page 99 may be seen a statement of prices by vessel cargo during the last season. All these statements are furnished through the courtesy of Mr. E. E. Hooper, Secretary of the Lumbermen's Association of this city.

The receipts of butter during the year 1899, aggregated 230,986,886 pounds and shipments 196,270,910 pounds, as against 222,627,525 pounds received and 203,432,199 pounds shipped during the year 1898. During the year 1897 our receipts were 225,651,504 pounds and shipments 206,316,440 pounds; in 1896, 237,795,243 pounds were received and 222,004,126 pounds shipped-

The exports of butter from the United States during the fiscal year ended June 30, 1899, aggregated 20,247,997 pounds, valued at \$3,263,951, much the larger part being shipped to the United Kingdom, viz.: 10,278,788 pounds, valued at \$1,705,190. The West Indies and Bermuda took a considerable quantity, as likewise did British North America and Brazil. During the year immediately preceding, our exports aggregated 25,690,025 pounds, valued at \$3,864,765. The excellence of the American article is recognized in all foreign markets, and those whose inhabitants can afford the best quality of the necessities of life are the largest importers of the American product.

The receipts of cheese during the year aggregated 99,450,784 pounds and shipments 43,838,572 pounds, as against 89,880,966 pounds and 44,986,370 pounds, respectively, during 1898; 84,790,975 pounds and 56,619,902 pounds, respectively, during the year 1897; 72,011,611 pounds and 53,639,937 pounds, respectively, during the year 1896; 59,012,937 pounds and 52,226,151 pounds, respectively, during the year 1895, and 53,622,983 pounds and 56,062,563 pounds, respectively, during the year 1894. quantity of cheese exported from the United States during the fiscal year ended June 30, 1899, aggregated 38,198,753 pounds, valued at \$3,316,049, as against 53,167,280 pounds, valued at \$4,559,324, exported during the year immediately preceding, and 50,944,617 pounds, valued at \$4,636,063, exported during the year 1897. The principal countries to which this product was exported during the year were the United Kingdom, British North America, Cuba, Puerto Rico and Santo Domingo. exports for the year ended December 31, 1899, aggregated 34,686,833 pounds, valued at \$3,376,108, as against 40,523,994 pounds, valued at \$3,376,818 exported during the year 1898, and 60,180,651 pounds, valued at \$5,432,371, during the year 1897.

The receipts of lard during the year aggregated 62,834,052 pounds and shipments 505,834,067 pounds, as against 65,083,445 pounds and 526,663,221 pounds, respectively, during the year 1898; 50,267,498 pounds and 444,333,255 pounds, respectively, during the year 1897; 67,191,567 pounds and 413,447,968 pounds, respectively, during the year 1896, and 53,936,324 pounds and 387,437,699 pounds, respectively, during the year 1895. The month of the largest shipments of this article from Chicago, was the month of December, when 50,589,525 pounds were shipped.

The demand for this article is remarkably uniform and comes from every quarter of the globe. The largest shipments were via the Pittsburgh, Cincinnati, Chicago & St. Louis Railway, and aggregated during the year 94,842,295 pounds. The line that took the next largest quantity was the New York, Chicago & St. Louis Railroad, taking 80,077,192 pounds. The Baltimore & Ohio Railroad took the next largest quantity of any other railroad; by this line were shipped during the year 76,283,439 pounds. The quantity of this product exported from the United States during the fiscal year ended June 30, 1899, aggregated 711,259,-851 pounds, valued at \$12,208,462, as against 709,344,045 pounds, valued at \$39,710,672, exported during the fiscal year immediately preceding, and 568,315,640 pounds, valued at \$29,126,485, exported during the fiscal year ended June 30, 1897. Of the quantity exported during the fiscal year ended June 30, 1899, 229,230,175 pounds were shipped to Germany, 204,645,770 pounds to the United Kingdom, 32,312,597 pounds to France, and 159,922,867 pounds to other parts of Europe. Our shipments to Cuba aggregated 27,291,504 pounds, to Brazil 17,889,650 pounds, to Mexico 3,270,339 pounds, and to Africa 3,253,787 pounds.

Of meats other than barreled pork, the receipts at Chicago during the year aggregated 197,603,530 pounds and the shipments 863,363,437 pounds, as against 229,005,246 pounds received and 923,627,722 pounds shipped during the year 1898; 169,787,811 pounds received and 837,630,339 pounds shipped during the year 1897; 151,931,671 pounds received and 714,667,394 pounds shipped during the year 1896, and 172,203,523 pounds received and 698,210,341 pounds shipped during the year 1895. meats, in a great variety of forms adapted to all sections of this country as well as to foreign markets, and to the army and navy subsistence stores, are provided by the great packing establishments of this city, with such thoroughness as to meet with universal favor; they are of superior quality and sold at such moderate prices as to be in demand from all classes. tity of fresh beef exported during the fiscal year ended June 30, 1899, aggregated 282,139,974 pounds, valued at \$23,545,185, as against 274,768,074 pounds, valued at \$22,966,556, exported during the preceding fiscal year, and 290,305,930 pounds, valued at \$22,653,742, exported during the fiscal year ended June 30, 1897. There were shipped to the United Kingdom during the last year 281,041,427 pounds, so that it may be seen that almost the entire foreign demand for fresh American beef came from the United Kingdom. Our exports of canned beef during the last fiscal year aggregated 38,385,475 pounds, valued at \$3,503,293. This product is shipped mainly to the United Kingdom, Germany, and to other parts of Europe, also to British North America, and quite a large quantity to Africa.

Our exports to Cuba and other West India islands are destined to substantially increase. Our exports of bacon during the last fiscal year aggregated 562,651,480 pounds, valued at \$41,557,067. Much the larger part of this quantity was shipped to the United Kingdom, viz.: 395,474,204 pounds. We exported of hams during the fiscal year last passed 225,846,750 pounds, valued at \$20,774,084, as against 200,185,861 pounds, valued at \$18,987,525, exported during the fiscal year immediately preceding, 165,247,302 pounds, valued at \$15,970,021, exported during the fiscal year ended June 30, 1897. Of our exports of hams during the last fiscal year, we shipped to the United Kingdom 177,702,854 pounds, and 31,500,000 pounds to the continent of Europe. fresh and salted pork we exported during the fiscal year last passed 178,507,564 pounds, valued at \$10,639,727, as against 100,357,363 pounds, valued at \$5,722,036 exported during the fiscal year ended June 30, 1898, and 68,075,344 pounds, valued at \$3,392,030, exported during the fiscal year ended June 30, 1897. A large portion of this exportation went to the United Kingdom. Germany, other parts of Europe, to British North America, Santo Domingo, Cuba, Puerto Rico and other West India islands.

The receipts of dressed beef during the year, aggregated 144,-989,985 pounds and shipments 1,061,868,376 pounds, as against 110,286,652 pounds received and 1,060,859,808 pounds shipped during the year 1898, and 86,456,930 pounds received and 1,007,-299,652 pounds shipped during the year 1897. Of the quantity shipped during the year 1899, the Chicago & Grand Trunk Railway took out 271,127,543 pounds; the Pittsburgh, Cincinnati, Chicago & St. Louis Railway, 153,593,313 pounds; the New York, Chicago & St. Louis Railroad, 139,574,798 pounds, and the Lake Shore & Michigan Southern Railway, 136,880,501 pounds. The month of the largest shipments of this article was the month of October, but during each month from May to December,

inclusive, more than 90,000,000 pounds were shipped out of this market.

The receipts of live stock during the year, comprising cattle, sheep, hogs, calves and horses, numbered 14,623,435 head. Our shipments of these animals during the year aggregated 3,006,532 head. The valuation of live stock received during the last year was \$233,711,180, and the total valuation of stock received in this market from 1866 to 1899, inclusive, was \$5,246,596,038. Our receipts of hogs last year numbered 8,177,870; of sheep 3,682,832, which were the largest ever before received in one year. The average weight of hogs received during 1899 was 237 pounds. The prices of cattle, calves and sheep show a gratifying increase over the prices for such animals during the preceding year.

Horses have been in better demand than for many years and there appears to have been quite a scarcity of desirable styles, so that really fine animals have commanded good prices. It has been a year of great prosperity to producers of live stock, not only in this market but throughout the country, and a gratifying feature of the trade is that it has been a steady improvement. Union Stock Yards, in which the business of handling live stock is transacted, covers 475 acres of land, 320 acres of which are covered with plank and brick flooring. Brick flooring will be substituted for the plank flooring as fast as practicable, as it insures cleanliness and safety, and is of great and appreciative advantage to all concerned and in the end much more economical. Within the Stock Yards are 13,000 pens, 8,500 of which are covered, for the housing of hogs and sheep. These covered pensoccupy 75 acres of ground and many of them are double decked, affording superior facilities for quickly unloading and assorting the largest receipts. Within the yards are 25 miles of streets, 38 miles of water troughs, 90 miles of water pipes and 50 miles of sewerage. The yards are provided with six artesian wells, which furnish an abundant water supply. All these improvements and conveniences have a marked effect upon the condition and appearance of these animals as they appear for inspection. The yards provide an abundance of the best kinds of fodder, and every requisite attention is paid by the company's employes in order to have the stock well watered, fed and promptly yarded.

The population of Chicago, according to the school census of 1898, was 1,851,588—in the north division, 326,817; in the south

division, 680,527; in the west division, 844,683. The population is made up of the following nationalities, showing the number of persons of each nationality: Americans. 488,683; Belgian, 2,011; Bohemian, 89,280; Canadian, 34,907; Danish, 21,761; English, 44,223; French, 21,840; German, 490,542; Greek, 1,644; Colored, 25,814; Hollandish, 19,148; Hungarian, 4,452; Irish, 248,142; Italian, 23,061; Lithuanian, 1,411; Mexican, 152; Norwegian, 45,690; Polish, 96,853; Chinese, 2,445; Russian, 38,987; Scotch, 22,942; Spanish, 568; Swedish, 111,190; Swiss, 4,401; Welsh, 3,784; other countries, 11,713.

The death rate for the twelve months ended December 31, 1899, per 1000 of mean population, was, of white persons 14.43, of colored 24.41, or an average rate, including white and colored, of 14.57; as against 14.07 for the twelve months ended December The number of deaths from all causes during the year 1899, was 25,503, comprising 24,905 white persons and 598 colored. The number of deaths under one year of age was 5,520, out of a population, under one year of age, of 46,475. The annual death rate, under one year of age, was 118.77. The number of deaths of children between one year and five years of age, was 3,360 out of a population between one year and five years of age, of 161,784. The annual death rate per thousand of those between one year and five years of age, was 20.76. The foregoing death rates are computed on the public estimate of the population by the Department of Health, July 1,1899, to wit: 1,750,000. The number of deaths during the year from pneumonia was 3,438; from consumption, 2,516; from violence, 1,554; from diseases of the heart, 1,492; from nephritis, 1,180, from bronchitis, 1,014; from typhoid fever, 442; from diphtheria, 843.

During the year, the sinking funds have been increased \$478,-193.35, of which \$304,377.62 was saved from interest account, instead of being passed to the general fund and permitted to be used by the city departments for current expenses. Heretofore this fund has been absorbed by expense accounts and in previous years has lost its identity. This has been corrected under the present administration. The bonded indebtedness, during the year 1899, was reduced \$91,900. Municipal bonds, 7 per cents., were refunded to the amount of \$846,000, as follows: \$618,000 seven per cent. bonds which fell due July 1, 1899, refunded at $3\frac{1}{2}$ per cent., and \$228,000, seven per cent. bonds which fell due September

1, 1899, were refunded at $3\frac{1}{2}$ per cent. These bonds were sold at a total premium of \$51,502.96. The bonded debt amounts to \$16,825,050, comprising water loan, sewer loan, river improvement, municipal, school, tunnel and world's fair bonds. The annual interest on bond debt for 1899 was \$681,267. Improvement bonds to the amount of \$1,056,200 have been issued during the year, and \$693,600 of this class of bonds have been paid during the year. The outstanding improvement bonds, December 31, 1899, amounted to \$2,897,000. These bonds are payable from special assessment funds when assessments are collected. The balance in the city treasury, December 31, 1899, amounted to \$2,723,586.26.

The total area of Chicago, as reported by the Department of Public Works, is 190.6 square miles. The number of lineal miles of improved streets and alleys is 1,269.4; of unimproved streets and alleys, 2,804.6. The total lineal miles of streets and alleys is 4,074. The total park area of the city is 2,232.1 acres, comprising 323.7 acres on the north side, 627.3 acres on the west side and 1,281.1 acres on the south side.

VISIBLE SUPPLY.

The weekly "visible supply statement" issued by the Chicago Board of Trade and by the New York Produce Exchange, is a statement of the stock of grain in the principal grain markets of the country and of the quantity of grain on the lakes, either afloat in lake ports, or in transit. It does not include stocks in private elevators, over which there is no official control. This plan, which has been adhered to for several years, is one which experience has approved; and the weekly visible supply statement is an authentic, official statement of the supply of grain under official control and cognizance in the principal grain markets of the country and afloat on the lakes. This statement is a valuable and reliable one issued each week for the information of the trade both in this country and in foreign markets. It would be manifestly injudicious, to say the least, to attempt to report stocks in private grain warehouses in a statement of this kind. "Bradstreet" reports stocks of grain, both in public and private warehouses, and that statement, on the basis of what it purports to be, is also a valuable statement, but it is thought by the trade that the Chicago and New York visible supply statement should preserve its own character as distinctively an official statement

in the form in which I have described it. As a matter of fact, it is impossible to report, in a mathematical sense, the entire visible supply of grain in the country. A few years ago it was attempted to include in the visible supply statement an estimate of the quantity of grain in transit on rail, but it was found to be necessarily unreliable and it was therefore concluded to eliminate the statement of quantity in transit by rail. This conclusion was arrived at because it was a fair inference that a large majority of the quantity in transit by rail was destined for immediate consumption and could not therefore be properly included in the visible or available supply of grain.

This explanation is made somewhat at length as there appears, though to a very limited extent, to be a misapprehension with regard to the visible supply statement—its scope, its character, its value as a comparative statement, and the fact that it is a report of stocks of grain in warehouses, located in commercial centers, which are under the direct control of some commercial body or of the state. This misapprehension is the result of a superficial examination or understanding of the statement, which latter is a statement of the supply of grain in the places therein designated. It is precisely what it professes to be. It conveys no erroneous impression, and it is the more reliable as it includes, as before stated, the official returns of stocks of grain in the principal grain centers of the country and shows the stock of grain that is readily available for It would be quite inaccurate and quite injudicious to include in such a statement, private stocks or stocks of grain in private warehouses, which to a large extent are not available. These stocks are held by their owners in most cases under their own control, in view of personal plans; not offered on the market and not considered a part of the public available grain stocks of the United States.

WHEAT.

The wheat market was of narrow range and was on the whole disappointing. Estimates proved, as conditions developed, out of line with final returns, especially with regard to reserve stocks which were thought to be well nigh exhausted. The volume of Argentine shipments during the calendar year footed up very much larger than was anticipated and exceeded the early predictions made of the extent of the entire crop. The same was practically true of Russian shipments. Although the American crop

was about 130,000,000 bushels less than was that of the preceding year, it was still in excess of the quantity generally predicted. The speculative interest failed to consider the extent of the new acreage sown to wheat induced by high prices resulting from the memorable Leiter deal, so that the market throughout the year was a tryingly disappointing and weary one. Persevering and staying speculators turned their contracts over from month to month in the vain hope that an advance would reward their patience. The opening prices of the year ranged from 67½ to 70 cents per bushel, not changing materially until the last few days of January, when prices advanced to 76 cents and closed on the 31st at from $71\frac{1}{4}$ to 74 cents. The market during the month of February was a dragging one and ranged from 69½ to 74½ cents, the latter price holding but a single day. The course of the market shed but a ray of light upon the situation and speculators saw but little to enlighten them as to the future course of values. market during the month of March was much the same as during February, and was devoid of any special interest, and at the close of the month operators were "at sea." April trading was active and developed some strength and brought reviving hopes; the steadiness continued during the month of May and brought a good measure of encouragement to the trade. Sales were effected at close of the month at from 77 to $79\frac{1}{2}$ cents, owing to an increased This improvement, however, was not fully demand for shipment. sustained during the succeeding month, and during the latter part of June prices gradually and persistently declined, dropping to 72 to 73 cents on the 30th. After a slight advance early in July, dullness again set in, and on the last day of that month sales were made at $68\frac{3}{5}$, although on that day 71 cents was reached. market during the month of August fluctuated within a narrow range and the trade was dull. September brought no change as to the general features of the market, and no material change in the course of prices. The month of October was a month of marked depression, many holders abandoning their lines and retiring from active operations. As a consequence, the November market was one of extreme dullness and prices sagged off from mere neglect; sales were made on the 29th at $65\frac{1}{2}$ cents, and the laconic remark heard on all sides was, "nothing in it," which remark seems to sum up the situation and was emphatically descriptive of the trade for the entire year. The trade during the

closing month of the year was much the same as the November market, and sales at its close were from $65\frac{3}{4}$ to $68\frac{1}{2}$ cents per bushel.

The following table shows the extreme prices in each year for thirty-five years, indicating the month in which such prices were obtained:

WHEAT.

<u> </u>		.DA1.	
Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.

CORN.

The market for corn during the first part of the year was one without clearly defined characteristics. Bearish influences seemed to prevail, notwithstanding a general conviction that reserve stocks in cribs were not large and that they were steadily being reduced. The export demand was well maintained and advancing price of cattle and of meats kept up the farm price of

corn relatively higher than prices in primary and shipping mar-The quantity recorded in the visible supply statement during the last year was materially less than was shown in the corresponding statement of 1898. And yet, in spite of these facts, the market was, most of the year, comparatively neglected. trade seemed to be slow to believe that an advance would take place in the price of corn. It is not an impressionable market and requires patience from those who would be its friends. that patience is persistently exercised, it is frequently well The quantity in store January 7, 1899, aggregated 6,672,752 bushels, as against 14,975,627 bushels on the first day of January, 1898. At the close of the year there were in store 2,994,801 bushels, as against 5,706,415 bushels at the close of the year 1898. The quantity of corn included in the "visible supply" on the 7th day of January, 1899, was 20,935,000 bushels as against 38,421,000 bushels on the 1st day of January, 1898; and on the 30th of December, 1899, 11,598,000 bushels, as against 19,126,000 bushels on the 31st of December, 1898.

The quantity of corn estimated by the United States Agricultural Department on farms March 1, 1899, was 773,729,528 bushels, as against 800,533,109 bushels on March 1, 1898. The quantity exported during the year ended December 31, 1899, as elsewhere stated, was 206,135,233 bushels, valued at \$82,728,589, as against 207,309,381 bushels, valued at \$77,315,689 exported during the year ended December 31, 1898. The demand for this great product by European markets is destined to largely increase. Our receipts of corn during the year aggregated 133,776,350 bushels, and shipments 116,552,096 bushels, as against 127,426,374 and 130,397,681 bushels, respectively, during the year, 1898; 118,086,662 bushels and 104,666,956 bushels, respectively, during the year 1897.

The number of cars of corn received during the year was 154, 270, as against 158,521 received during the year 1898, and 165,692 during the year 1897. There were received during the year by lake and by canal, 2,812,171 bushels, as against 2,782,100 bushels during the year 1898, and 1,745,161 bushels during 1897. Sales of cash corn, contract grade, were made at the beginning of the year at from 36 to 37 cents per 56 pounds. Prices during January ranged from $35\frac{1}{4}$ to $38\frac{1}{8}$ cents per bushel, the latter price being obtained but for one day. Most of the sales during the month were made

at about 36 cents per bushel. Business in this grain during February was very light, at prices leaning toward the buyer; sales ranged between 34 to 37 cents per bushel. The "bulls" and the "bears" on the market were so evenly balanced that fluctuations were within a narrow range throughout the month. During March, however, the sellers predominated and prices were upon a low plane. Many sales were made at $33\frac{1}{2}$ to $33\frac{5}{8}$ cents per bushel, and some lots about the middle of the month, at 33 cents. Indications at this time were strongly in favor of continued reduction in prices. The market, though, held fairly steady during the month of April, but in May, prices weakened again. The June market was stronger, and prices recovered, sales ranging from $33\frac{3}{8}$ to $35\frac{1}{2}$ cents per bushel.

This improvement in the cash market failed to inspire any general confidence in prices for delivery during July or September. Indications of another big crop brought out a large selling interest and induced holders to retire from the market; as a consequence, prices for delivery at a time when the growing crops would be sufficiently seasoned to be safely marketed were decidedly in buyers' favor. Quotations on the last day of July, for delivery during December, were from 29 to 29\frac{3}{8} cents per bushel; and during August, sales for December delivery were made at 28 cents, while cash or spot corn was sold at 31 to 31½ cents per bushel. In September, an improved cash demand imparted confidence to the market, and sales for delivery during December were made at 30\frac{3}{8} cents per bushel. During October the relative position of the cash and December deliveries changed—the December improved and the spot or cash market declined. Spot sales were made at from 31 to 323 cents per bushel, and corn, for December delivery, at from 30 to 321 cents per bushel, closing on the last day of October at from 31½ to 31½ cents per bushel. The November market was without material change, receiving but little attention either from cash or speculative traders. Spot and December prices were about the same on the last of the month. The December market was dull, cash corn ranged from 30 to 31½ cents per bushel, closing at about 31 cents per bushel. Persevering holders changed their trades into May and discouraged ones abandoned their holdings and paid their losses.

The following table shows the extreme prices in each year for

thirty-five years, indicating the month in which such prices were obtained:

CORN.

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865	December	38 @ 88	January and February.
1866	February	$33\frac{8}{4}(a)1\ 00$	November.
1867	March	$56\frac{8}{4}(a)1 12$	October.

1896	September $ $	$19\frac{1}{2}(\widetilde{a}) 30\frac{5}{8}$	April.
1897	January and February	$21\frac{8}{4}(a) 32\frac{5}{8}$	August.
1898	January	$26 (\widetilde{a}) 38$	December.
1899	December	30 (a) 381	January.

OATS.

Our receipts of oats during the year aggregated 110,775,732 bushels, as against 110,293,647 bushels received during the year 1898. Our shipments during the year aggregated 85,982,204 bushels, as against 85,057,636 bushels shipped during the year 1898. The quality of last year's crop was excellent, and the weight per measured bushel was greater than for several years. Both the domestic and foreign demand was active and well sustained. Our city consumption aggregated about 25,000,000 bushels, and the demand from the eastern and middle states was uniformly a good one throughout the year. The superior quality of the crop had the effect to prevent mixing low grade of

barley with it, and, consequently, the consumption of the crop upon the basis of percentage to population was greater than for several years. While buyers could obtain oats of full weight and choice quality they would not buy an inferior quality, and hence there was no object in reducing the price by mixing with it common grades of barley or grain refuse. The market was strong and steady throughout the year. The shipments during August and September were quite heavy, over 20,000,000 bushels. the beginning of the year the "visible supply" statement showed 6,402,000 bushels, as against 12,337,000 bushels upon the corresponding date in 1898. At the close of the year "visible supply" statement recorded 5,694,000 bushels. The great oat-producing states are Illinois and Iowa, the crop of each state aggregating about 127,000,000 bushels The crop of the United States aggregated 796,177,713 bushels, valued at \$198,167,975. The valuation of last year's crop was in excess of that of any other crop since 1894. During that year the valuation was \$214,816,920 of a crop of 662,036,928 bushels. A strenuous effort was made during the summer to declare the "contract" grade "No. 3," instead of "No. 2," but it did not succeed. Chicago and the state of Illinois insisted on maintaining its high standard for contract grade. By far most of the sales of this grain are made upon the basis of samples or description, altogether independent of the definition of grade made by the State Inspection Department. The price No. 2 cash oats during January, 1899, ranged from $26\frac{1}{4}$ to $27\frac{3}{4}$ cents per bushel, closing at $27\frac{1}{2}$ cents. During the month of February there was but little change in prices, the range being from 27 to $28\frac{1}{4}$ cents. The March market was easier and recorded sales at $25\frac{1}{8}$ cents. During April, quotations ranged from $26\frac{1}{2}$ to $27\frac{1}{4}$ cents, closing on the 30th at $26\frac{1}{2}$ cents per bushel. The market during May was dull and weak, prices declining to 24 cents per bushel. June brought a sluggish trade, and though for a few days a slight improvement was apparent, it was not maintained, and sales were made on the 30th at 243 cents, while sales for September delivery were made at $21\frac{1}{2}$ cents per bushel. Trading during July was meager, and urgent selling, on the last of the month, forced prices down to $19\frac{7}{8}$ cents per bushel. The market lost its hold and fell quickly 3½ cents per bushel. The trade in August brought some recovery, but hardly sufficient to inspire any confidence. Not until September arrived did any advance take place. On the last day of this month sales were made at 23 cents per bushel. The market did not materially change during October, November or December. Sales on the 30th of the latter month were made at $22\frac{1}{4}$ cents, and for May delivery at $23\frac{5}{8}$ to $23\frac{7}{8}$ cents.

The following is the statement of the extreme prices each year for thirty-five years, indicating the month in which such prices were realized:

OATS.

		10.	
Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865 1866	December	$\begin{array}{cccccccccccccccccccccccccccccccccccc$	January. November.
1867	August	$38\frac{1}{2}(a) 90$	June.

	1		

BARLEY.

The receipts of barley during the year aggregated 15,849,710 bushels, as against 18,116,594 bushels received during the year 1898; 17,195,744 bushels during 1897, and 17,496,381 bushels during 1896. The shipments during the year aggregated 6,371.223 bushels, as against 6,755,247 bushels shipped during the year 1898;

7,717,351 bushels during 1897, and 9,767,708 bushels during the year 1896. The crop of barley, as estimated by the Department of Agriculture of the United States, aggregated 73,381,563 bushels, grown on 2,878,229 acres, valued at \$29,594,254, as against 55,792,257 bushels, raised on 2,583,125 acres, valued at \$23,064,259, in 1898. The crop produced in 1897 aggregated 66,685,127 bushels and was valued at \$25,142,139. The largest barley-producing states are Iowa, Minnesota, Wisconsin, the Dakotas, Kansas, New York, Washington, Ohio, Michigan, Oregon and California—the latter state yielding last year 22,239,776 bushels, valued at \$11,119,888. The quantity in store of this grain in Chicago on the 7th day of January, 1899, was 660,531 bushels, as against 599,388 bushels upon the corresponding date in 1898, and 112,150 bushels upon the corresponding date in 1897. In the "visible supply" statement, on January 7th, 1899, there was reported 4,025,000 bushels, as against 4,348,000 bushels on January 1, 1898, and 4,403,000 bushels ou the 3d of January, 1897. The quality of the last crop was poor, owing to extremely unfavorable weather prevailing about harvest time. fortunate for the market that the foreign demand for coarse grain was good and that barley in European countries is used extensively for feed purposes. An active export demand came to the relief of a market which it was feared would be controlled by short sellers, who operated in view of a decline based upon the very ordinary quality of the crop. The short seller was disappointed, and was forced by substantial advances, caused by foreign orders, to submit to losses at various times throughout the year. This grain is sold in almost entire disregard of the grades defined by the inspection rules; it is sold by sample—color, weight and cleanliness being important considerations. There were many spasmodic features to the market, especially in regard to prices for feed Low grade malting barley ranged from 35 to 43 cents per bushel. Choice to fine grades started at the beginning of the year from 38 to 43 cents per bushel and afterwards worked up to 43 to 45 cents. Statement of prices may be found stated on page 17, also on pages from 63 to 85 inclusive.

The quantity of this grain exported during the fiscal year ended June 30, 1899, aggregated 2,267,400 bushels, as against 11,237,077 bushels exported during the fiscal year immediately preceding. The quantity exported during the twelve months

ended December 31, 1899, aggregated 16,941,846 bushels, valued at \$8,225,601; as against 4,540,955 bushels, valued at \$2,318,929, exported during the twelve months immediately preceding.

RYE.

The receipts of rye during the year aggregated 2,793,476 bushels, as against 4,935,308 bushels received during the year 1898; 3,388,651 bushels during 1897; 2,530,336 bushels during 1896, and 1,657,216 bushels during 1895.

The shipments during the year aggregated 2,282,442 bushels, as against 4,453,384 bushels shipped during the year 1898; 3,800,-872 bushels during 1897; 1,374,509 bushels during 1896, and 1,168,252 bushels shipped during the year 1895.

The quantity of rye in store in Chicago on January 7, 1899, was 451,027 bushels, as against 599,388 bushels on January 1, 1898, and 1,120,064 bushels on the 2d day of January, 1897. At the close of the year 1899 there were in store 228,929 bushels, as against 434,766 bushels on the corresponding date of the year 1898, and 598,731 bushels on the 25th day of December, 1897. The quantity shown by the "visible supply" statement of the 7th of January, 1899, was 1,386,000 bushels, as against 4,055,000 bushels January 1, 1898, and 3,044,000 bushels January 2, 1897.

During the fiscal year ended June 30, 1899, the United States exported 10,140,866 bushels of rye, as against 15,541,575 bushels exported during the preceding year, and 8,560,271 bushels exported during the fiscal year 1897. Our exports of rye during the calendar year ended December 31, 1899, aggregated 4,852,340 bushels, valued at \$3,096,533, as against 15,718,571 bushels, valued at \$9,181,179 exported during the preceding calendar year, and 10,582,992 bushels, valued at \$5,097,150, exported during the year ended December 31, 1897. Of our exports during the fiscal year last past, 4,036,554 bushels were shipped to Germany, 1,689,787 bushels to Sweden and Norway, 1,331,036 bushels to Denmark, 1,293,508 bushels to the Netherlands, and 1,120,255 bushels to the United Kingdom.

Business at home in this grain was moderate, and the range of prices was about 13 cents. The comparatively low prices of wheat curtailed the foreign demand and the domestic consumption was not sufficiently urgent to impart any special animation to the trade. The market at the beginning of the year ranged from $53\frac{1}{2}$

to 55 cents per bushel for No. 2 in store. The highest prices during the year were realized in the latter part of May and the first of June, and were 62 cents per bushel. Prices at the close of the year were from 50 to $50\frac{1}{2}$ cents per bushel. A complete statement of prices of the various grades of this grain may be found on page 17 of the statistical part of this report. A large proportion of this grain is sold by sample to distillers and millers.

FLOUR.

The receipts of flour at Chicago during the year 1899 aggregated 5,800,130 barrels, as against 5,316,195 barrels received during the year 1898, 2,947,005 barrels received during the year 1897, and 2,531,995 barrels during the year 1896. The shipments of flour from Chicago during the year 1899 aggregated 5,421,548 barrels, as against 5,032,236 barrels shipped during the year 1898, 2,736,211 barrels shipped during the year 1897, and 2,854,832 barrels shipped during the year 1896.

The number of barrels of flour manufactured in Chicago during the year 1899 was 1,125,745 barrels, as against 1,037,442 barrels. during the year 1898, and 1,188,442 barrels during the year 1897. Our city consumption of flour last year is estimated at 1,585,536 There are few exclusive flour stores in the city. The millers of the country have, of late merly there were many. years, turned the flour dealer and flour commission merchant out of the road and they deal, to a large extent, direct with the grocer, both wholesale and retail, thus finding a more direct communica-Whether this is more of a benefit to the tion to the consumer. miller than to the consumer is a question. At all events, sales are made upon a comparatively small margin, and profits are made by increasing the volume of sales; the large mills are rapidly crowding out the small and ordinary sized mills; these latter kinds, in the main, have to be contented with a local trade and small returns.

The great mills of the country are reaching out more and more to foreign markets, and are looking for profits along the line of largely increased production, superior quality of product and of extensive advertising all over the world.

The number of barrels of flour exported from the United States during the fiscal year ended June 30, 1899, was 18,485,690 barrels, valued at \$73,093,870, as against 15,349,943 barrels, valued at \$69,263,718, exported during the fiscal year immediately preceding,

and 14,569,545 barrels, valued at \$55,914,347, exported during the fiscal year ended June 30, 1897. Of our exports of flour during the last fiscal year, we exported 10,233,360 barrels to the United Kingdom, 1,377,544 barrels to the Netherlands, 1,221,314 barrels to Hongkong, 818,816 barrels to Brazil, about 600,000 barrels to the Dominion of Canada, 502,874 barrels to Germany, about 1,300,000 barrels to the West Indies, and 226,000 barrels to Japan. justly complained of the discrimination by railroads against flour and in favor of wheat as seriously damaging to our export trade The range of prices during the year was small, not excecding, on an average, 60 cents per barrel. Standard patents sold from \$3.75 to \$4.45 per barrel; export bakers, \$2.30 to \$2.75; winter patents, \$3 35 to \$4.10. A complete statement of flour values may be seen on page 7 of this report, also a valuable comparative statement of prices of spring wheat flour, from 1893 to 1899, inclusive.

A statement of the closing prices during the years 1896 to 1899, inclusive, is submitted herewith:

	1899	1898	1897	1896
Winter patents Winter straights Minnesota straights Minnesota patents Low grades	3 10@3 20 2 90@3 00 3 40@4 00	$\begin{vmatrix} 3 & 20 & 3 & 40 \\ 2 & 90 & 3 & 10 \end{vmatrix}$	4 30@4 40	\$\frac{\$4 50@4 75}{4 20@4 60}\$ \$\frac{3 90@4 00}{4 30@4 50}\$ \$\frac{1 35@2 20}{20}\$

The expansion of our foreign trade may be realized by a perusal of the following statement of our exports of flour each year from 1870 to 1899, inclusive:

	BARRELS.		BARRELS.

HAY.

Our members engaged in the hay trade report a more satisfactory business than the record of 1898 disclosed, especially during the latter part of the year. This was mainly owing to the fact that the crop in the east and south was short and the yield throughout the west was not only large but of excellent quality. While the crops east and south suffered from severe drought, the west was favored with timely rains. Our receipts did not vary in volume materially from like receipts during the year 1898. local trade, to a large extent, readily absorbed the supply. ranged higher than for several years and are estimated to have averaged about \$2.00 per ton higher than during the year 1898. The market maintained a healthy tone throughout the year. Much improvement is observed in the care and uniformity with which hav is loaded and shipped from the west, which is largely the result of the efforts of the National Hay Association, which is one of the most important commercial organizations of the country and in which the members of the board engaged in this business are influentially represented. The crop of hay, as estimated by the United States Agricultural Department for the year 1899, was 56,655,756 tons, produced on 41,328,462 acres, valued at \$411,-926,187, as against 66,376,920 tons grown on 42,780,827 acres, valued at \$398,060,647, during the year 1898.

As elsewhere stated in this volume, the United States exports of hay during the fiscal year last passed aggregated 64,916 tons, valued at \$858,992. The quantity received at Chicago during last year was estimated at 208,000 tons, as against 223,000 tons during the year 1898; and the value of hay sold from \$2,500,000 to \$3,000,000. A statement of the prices of hay, which were obtained in this market during the year, may be found on page 97 of this volume, clearly showing the marked improvement in this market over that of the year immediately preceding.

SEEDS.

The receipts of timothy seed during the year aggregated 66,233,991 pounds and shipments 52,430,340 pounds, as against 73,734,806 pounds and 54,330,625 pounds, respectively, during the year 1898; 57,079,591 pounds and 46,417,248 pounds, respectively, during the year 1897, and 61,772,523 pounds received and 63,368,857 pounds shipped during the year 1896. Of clover

seed we received 7,855,759 pounds and shipped 12,330,932 pounds during the year, as against 9,105,852 pounds received and 11,303,427 pounds shipped during the year 1898, and 13,007,821 pounds received and 17,230,467 pounds shipped during the year 1897. Of other kinds of grass seeds our receipts during the year aggregated 10,136,159 pounds and shipments 11,318,254 pounds. The general conditions of the market for timothy and clover seed were favorable in comparison with the market during the preceding year, which was one of extreme dullness. Still the market was an indifferent one to such a degree as not to induce any speculative transactions, and the course of prices was steady. There were times during the year that the growers of grass seeds held for higher prices, but this policy did not quicken or increase the demand, and the full volume of receipts was resumed. The period of the greatest activity during the year was between July and October. A full statement of prices of clover and timothy seed may be examined on page 91 of the statistical portion of this volume.

The improvement in prices is mainly with regard to clover The difference between the lowest and highest prices for timothy seed was greater during the last year than during the preceding year. The exports of timothy seed from the United States during the year aggregated 16,149,611 pounds, valued at \$492,710. The Dominion of Canada took 8,896,745 pounds, Germany 4,426,129 pounds and the United Kingdom 1,612,267 pounds. Our exports of clover seed aggregated 19,980,434 pounds, valued at \$1,264,922. Germany took 10,906,038 pounds, the United Kingdom 4,827,722 pounds, Belgium 1,175,628 pounds and the Dominion of Canada 1,029,604 pounds. The market opened at from \$3.25 to \$7.00 per cental for clover seed, covering poor to choice grades. The highest prices were reached in September, during the latter part of which month \$8.50 per cental was obtained for choice grades. At the close of the year choice clover seed sold at \$8.10 per cental and "poor" grades at \$5.00 to \$5.50.

FLAXSEED.

The receipts of flaxseed during the year aggregated 6,616,626 bushels and shipments 3,093,943 bushels, as against 5,481,173 bushels received and 3,366,739 bushels shipped during the year 1898; 4,976,209 bushels received and 2,859,493 bushels shipped

during the year 1897, and 10,299,525 bushels received and 5,734,654 bushels shipped during the year 1896. Flaxseed sold at a higher price last year than at any time since June, 1895. Both the domestic and foreign demand were quite good. Crushers were in the market daily and the very favorable market for oil enabled sellers of flaxseed to obtain good prices. The year opened with a good demand, which, being well sustained, advanced prices gradually and steadily until \$1.25 was paid in the middle of April. From this time until about the middle of August, prices declined, caused by prospects of an exceptionally large crop, reports of greatly increased acreage and a general disposition to sell rather extensively for future delivery. Under the operation of such conditions prices inevitably softened. In August a new set of conditions was developed and buying was resumed. A foreign demand sprung up. Unfavorable reports came from Russia and the export trade increased. Our crushers became somewhat anxious and bought not only from present stock but also for future delivery. A detailed statement of prices may be seen on pages 86 to 88, inclusive, of this volume. The exports of flaxseed from the United States during the fiscal year ended June 30, 1899, aggregated 2,830,991 bushels, valued at \$2,815,449, as against 257,228 bushels, valued at \$231,237, exported during the fiscal year immediately preceding. The quantity exported during the year ended December 31, 1899, aggregated 2,794,846 bushels, valued at \$3,525,667, as against 2,768,860 bushels, valued at \$2,746,182, exported during the year immediately preceding.

LIVE STOCK AND PROVISION TRADE.

The number of cattle received at this market during the year 1899 was 2,514,446, as against 2,480,897 during 1898, 2,554,924 during 1897, 2,600,446 during 1896, 2,588,558 during 1895, and 2,974,363 during 1894. The number of cattle received at Chicago during thirty-four years from 1865 to 1899, inclusive, was 59,-365,409. The largest number of cattle brought to Chicago by any railroad during the year was brought by the Chicago, Burlington & Quincy Railroad, and was 602,400; the next largest number was delivered by the Chicago & Northwestern Railway and was 549,367; the Chicago, Milwaukee & St. Paul Railway brought in 390,684. The number of car loads of cattle received during the year was 124,015, as against 124,191 arrived during the year 1898.

On page 41 may be seen a statement of receipts and shipments of cattle and of sheep, showing the railway lines over which received and shipped, and also the receipts and shipments each month; also showing the number used for city consumption and packing. Receipts of all kinds of live stock at Chicago during the year numbered 14,623,435 head, as against 15,138,937 head received during the year 1898. The valuation of our receipts of live stock during the year 1899 amounted to \$233,711,180, as against \$229,301,296 during the year 1898. The valuation of cattle received during the year 1899 was \$123,207,854, as against \$119,075,472 representing the valuation of cattle received during the year 1898.

During the year just closed cattle sold at the highest prices since 1883. The quality of the meat was never better and the thoroughness and facility with which it is handled and prepared for domestic and foreign markets easily makes this a market for cattle without a competitor. Native beef cattle sold at an average of about $65\frac{1}{2}$ cents per 100 pounds higher than during the year 1898. The demand for canned meats was very extensive, especially from European governments. An unusual number of soldiers in the field at home and abroad stimulated the demand for American canned meats and kept our plants busy throughout the season and at times taxed them quite severely. The latter part of the year was specially busy. Some foreign orders were received for 500,000 to 1,000,000 pounds of canned stock. It is the opinion of those best qualified to judge upon such matters, that prices during 1899 were from \$5.00 to \$8.00 per head higher than those that ruled during the preceding two years. Of canned beef the United States exported during the fiscal year ended June 30, 1899, 38,385,472 pounds, valued at \$3,503,293. Of fresh beef our exports aggregated 282,139,974 pounds, valued at \$2,525,784. larger portion of this product was shipped to the United Kingdom. The number of cattle exported during the year ended June 30, 1899, was 389,490, valued at \$30,516,833. Three hundred and eight thousand one hundred and twenty-six of the total number exported were shipped to the United Kingdom and 72,890 to Cuba.

The receipts of sheep during the year aggregated 3,682,832 head, as against 3,589,432 head during 1898; 3,606,640 head during 1897; 3,590,655 head during 1896; 3,406,739 head during 1895, and 3,099,725 head during 1894. The number of sheep received at Chicago from 1865 to 1899, inclusive, was 44,549,687.

The shipments of sheep during the year aggregated 386,991 head, as against 543,425 head shipped during the year 1898; 638,110 head during 1897; 561,239 head during 1896; 474,646 head during 1895, and 333,398 head during the year 1894. The number of sheep exported from the United States during the fiscal year ended June 30, 1899, was 143,286, valued at \$853,555, as against 199,690 valued at \$1,213,886 exported during the preceding year and 244,120 valued at \$1,531,645 exported during the year ended June 30, 1897. During the fiscal year last passed, 98,080 sheep were shipped to the United Kingdom, 34,782 were shipped to the Dominion of Canada, 2,009 to Cuba, 3,235 to Mexico, 1,883 to Bermuda and 1,176 to British Guianas.

A complete statement of receipts and shipments of sheep during the year may be seen on page 41 of this volume, showing the names of the transportation lines over which received and over which shipped, and also showing receipts and shipments each month of the year. The number of sheep slaughtered in Chicago during the year 1899, was 3,310,000, which was 300,000 more than was ever slaughtered in this city during any other year. Prices during the year were the highest since 1893, notwithstanding our receipts were the largest ever recorded.

The advance in the price of wool increased more than anything else the value of sheep, though a steady demand for mutton materially contributed to that advance. The average price was 15 cents per 100 pounds higher than in 1898, \$1.12\frac{1}{2}\$ higher than in 1896 and \$1.50 to \$1.60 higher than in 1894. The mutton quality of sheep this year was very much finer than in previous years. The range of prices for native sheep was from \$2.25 to \$5.65; for native yearlings and lambs, \$3.50 to \$7.45; for western sheep, \$2.50 to \$5.55; for western and Mexican lambs, \$4.00 to \$7.00. The average weight of sheep received during the year 1899 was the lightest recorded, the larger part of the year's receipts being lambs.

The receipts of hogs during the year ended December 31, 1899, aggregated 8,177,870 head, as against 8,817,114 head received during the year 1898, 8,363,724 head during 1897, and 7,659,472 head during 1896. The average weight of hogs received during 1899 was 237 pounds, their total valuation \$79,734,233. The average weight of hogs received during 1898 was 234 pounds. The number of hogs

exported from the United States during the fiscal year ended June 30, 1899, was 33,031, valued at \$227,241. Most of this exportation was shipped to Cuba, Mexico and the Hawaiian Islands. The number of hogs exported during the year immediately preceding was 14,411, valued at \$110,487. The quantity of bacon exported from the United States during the last fiscal year was 562,651,480 pounds; of hams, 225,846,750 pounds; of fresh pork, 41,310,364 pounds; of salted or pickled pork,137,197,200 pounds, and of lard,711,259,851 pounds. The range of prices during 1899 for heavy packing hogs, weighing 250 to 500 pounds, was \$3.35 to \$4.95; for mixed packing hogs, weighing 200 to 250 pounds, was \$3.40 to \$5.00, and for light bacon hogs, weighing from 150 to 200 pounds, \$3.30 to \$5.00. These prices show an improvement over those which prevailed during the year 1898 of 20 to 30 cents per 100 pounds.

Through the kindness of Mr. J. C. Denison, the Secretary of the Stock Yards, the following table, showing receipts of live stock for each year from 1880 to 1899, inclusive, is submitted:

Year.	Cattle and Calves. Number.	Hogs. Number.	Sheep. Number.	Horses. Number.	Aggregate value.
1880 1881	1,547,498	7,059,355 $6,474,844$	335,810 493,624	10,398 12,909	\$148,057,626 183,003,710

The production of mess pork was limited, as compared with the production during previous years. The supply of pork left from the previous year was quite liberal, indeed a fair sized stock will be carried over into the year 1900. The speculative demand throughout the year was generally good. Fluctuations in prices were at times very great. The foreign demand was good throughout the

year. Prices ranged at from \$7.80 to \$10.50 per barrel, covering all grades, the highest price prevailing in the month of January and the lowest during the months of May and October. On January 3d sales were made at from \$10.15 to \$10.20 per barrel, as against \$9.05 to \$9.10 per barrel on the 3d of January, 1898. Standard mess pork sold at the beginning of the year at \$10.15 to \$10.20 per barrel. Soon thereafter the market declined to \$9.70 per barrel and remained at about that point until the 20th of January, when prices recovered to about \$10.00 per barrel. During the latter part of the month sales were made at from \$10.30 to \$10.40 per barrel. This range of prices was maintained but a brief period. On February 4 prices ranged from \$9.90 to \$9.95 per barrel, recovering slightly for a day or two and then reacted to \$9.90 per barrel. From this point prices gradually declined until on the 28th of February sales were made at from \$9.20 to \$9.25 per barrel.

March was a dull month in this trade, the closing prices of February were not maintained. The market closed on the 30th day of March at \$8.95 to \$9.00 per barrel. No material change took place in this market, which continued dull, during the month of April. The market still further declined during the month of May, ranging from \$7.85 to \$8.85 per barrel, the lowest prices prevailing during the latter part of the month. The trade during the month of June slightly improved. Prices, however, did not materially change. In July came a slight improvement, prices ranging during that month from \$8.15 to \$9.20 per barrel. The market during the month of August was exceedingly dull and sales were made within a very narrow range, viz.: from \$8.15 to \$8.60 per barrel. Most of the sales were in the neighborhood of \$8.25 to \$8.30 per barrel. Prices declined during the month of September, ranging from \$7.90 to \$8.25 per barrel. In October, sales were made upon a still lower plane, the highest price during that month being \$8.25 and but for a brief period, and the lowest price was \$7.90. was no material change in October from the September prices, and sales during November were made within about the same range. An improvement came during the middle of December. The highest price during that month was \$9.05 and the lowest \$8.00. part of the trading was done at \$8.80 to \$8.85 per barrel. exports of fresh pork, 40,770,229 pounds were shipped to the United Kingdom, and of salted or pickled pork, 49,908,985 pounds. Germany, the Netherlands, Belgium and the Dominion of Canada were large customers of the United States for this article; likewise

the West Indies, these islands having taken from the United States during last year about 21,000,000 pounds. We shipped to the Dominion of Canada about 140,000,000 pounds.

The total exports from the United States of fresh pork during the last fiscal year aggregated 41,310,364 pounds, valued at \$2,722,000, and of salted or pickled pork 137,197,200 pounds, valued at \$7,197,066. During the year ended December 31, 1899, the United States exports of fresh pork aggregated 34,041,243 pounds, and of salted or pickled pork 137,573,905 pounds.

The market for lard was a favorable one most of the year, the demand being active both on domestic and foreign account. exports from the principal Atlantic ports aggregated 352,083,000 pounds, as against 379,402,000 pounds exported during the year 1898, and 286,375,200 during 1897. There was a considerable volume of speculative trading in this article both by domestic and foreign operators. The total exports of lard from the United States during the last fiscal year, aggregated 711,259,851 pounds, valued at \$42,208,465, Germany taking 229,230,175 pounds, the United Kingdom 204,645,770 pounds, Cuba 27,291,504 pounds, the Netherlands 74,865,099 pounds, Belgium 37,307,555 pounds, France 32,312,597 pounds, and the West Indies about 37,000,000 pounds. There were also shipped 17,839,650 pounds to Brazil, 13,984,927 pounds to Austria-Hungary, 10,536,795 pounds to Denmark, and 5,536,080 pounds to Venezuela. During the year ended December 31, 1899, the exports of lard from the United States aggregated 600,068,669 pounds, valued at \$41,531,142.

During the year 1899 our receipts of lard aggregated 62,834,052 pounds and shipments 506,834,067 pounds, as against 65,083,445 pounds received and 526,663,221 pounds shipped during 1898. On page 42 may be seen a detailed statement of receipts and shipments by months, and also showing the names of the transportation lines over which received and over which shipped during the year. Sales in this market at the beginning of the year were at from \$5.45 to \$5.65 per 100 pounds, and at the close of the year at from \$5.15 to \$5.67 $\frac{1}{2}$. On pages 50 and 51 may be found a statement of weekly prices prevailing throughout the year, also of other standard hog products. On pages from 62 to 85, inclusive, may be seen a record of daily prices of lard.

THE CHICAGO SANITARY AND SHIP CANAL.

The construction of the Sanitary and Ship Canal was authorized by an act of the General Assembly of the State of Illinois,

approved May 29, 1889. It was under this act that the Sanitary District of Chicago was organized. Its boundaries include all that part of the City of Chicago lying north of 87th street, and fortythree square miles of territory in Cook County, outside the city The District is eighteen miles long from north to south and about nine and one-half miles wide on a line passing through the Court House in Chicago. Its extreme width is about fifteen The district contains 185 square miles and a population estimated at 1,800,000. Ground was broken for the work of excavation September 3, 1892, and in a little more than seven years from that date the Sanitary and Ship Canal was so far completed that it was ready for use. The water was first turned into the channel January 2, 1900, and on the 17th of that month, the channel in the meantime having been filled, the great bear-trap dam, constituting a part of the controlling works at Lockport, was lowered, and the water from Lake Michigan, after an interval of several centuries, once more resumed its flow towards the Gulf. quired flow at present is limited to 360,000 cubic feet per minute, but the channel is capable of carrying nearly twice that volume of water, and it is practically assured that within five years from this time arrangements will have been perfected to secure the maximum flow of 600,000 cubic feet per minute.

The Sanitary and Ship Canal begins at the junction of Robey street with the West Fork of the South Branch of the Chicago River, and extends to Lockport, distant 28.05 miles in a southwesterly direction. As the improved portion of the river from its mouth, a distance of six miles, may properly be considered a part of the Canal, its total length is thirty-four miles. The total amount of excavation included 28,500,000 cubic yards of glacial drift and 12,910,000 cubic yards of solid rock, or an aggregate of 41,410,000 cubic yards. The total cost of construction aggregated \$34,000,000 January 1, 1900.

The project for a deep waterway to connect the northern lakes with the Mexican Gulf is far from being a new idea. It has been actively agitated by the people of the Northwest, of the Middle States and of the entire Mississippi Valley, for more than half a century. It has been the dream of explorers and navigators for nearly three hundred years. As long ago as August 1, 1674, Joliet, the great explorer, writing to his friend, Father Dablon, said concerning a possible outlet from the Great Lakes to the Gulf:

"A very important advantage and one which some, perhaps,

will find it hard to credit, is that we could quite easily go to Florida in boats and by a very good navigation. There would be but one canal to make, by cutting only one-half a league of prairie, to pass from the Lake of Illinois (Lake Michigan) into the St. Louis River (the Desplaines River). The route to be taken is this: The bark should be built on Lake Erie, which is near Lake Ontario. It could easily pass from Lake Erie to Lake Huron, from which it would enter the Lake of Illinois. At the extremity of this lake would be the cut or canal of which I have spoken to have a passage to the St. Louis River, which empties into the Mississippi. The bark having entered this river could easily sail to the Gulf of Mexico."

When Joliet landed in Illinois he anchored his boat in the body of water now called Lake Michigan at a point near Summit, which is about eleven miles beyond and west of the present shore line at Chicago. Only a small stretch, composed mostly of glacial drift at that time prevented the water of the lake from discharging into the Illinois River. But this stretch, by natural accretions and artificial filling-in for the purpose of "making land," had extended from one-half a league of prairie to about ten miles in a little more than two centuries.

It has been said that the Chicago Sanitary and Ship Canal is a reversal of natural conditions, because it diverts the water of Lake Michigan from its natural flow. This statement, though made recently, was doubtlessly made in ignorance and, at any rate, is Those persons who have only a slight knowledge of geological history know that the building of the canal has merely renewed conditions as they existed not many centuries ago. canal is simply the restoration of an ancient outlet from the Lakes to the Mississippi River which existed for ages. The Great Lakes, with their connections, were once an arm of the sea. upheaval left them in a depression, from which their overflow sought the ocean in two mighty rivers, one setting its current towards the east from Lake Ontario, and the other sweeping away to the south from Lake Michigan and finally mingling its waters with those of the Gulf.

(The above information is taken from a memorial to Congress, presented by the Trustees of the Sanitary District, urging the construction of a ship waterway from Chicago to the Gulf of Mexico.)

With this work accomplished—one of the greatest artificial waterways ever constructed—the project of a deep waterway from the Great Lakes to the Gulf assumes a new prominence and appeals

with special and practical emphasis to the National government for its realization. Such a navigable waterway would contribute to the prosperity of every industry throughout the land; it would do more to bring about stable, uniform and reasonable freight rates than any legislation that could be devised; it would traverse an immense area of wonderful fertility, of most varied valuable resources-mineral, agricultural and industrial—an area occupied by a citizenship intensely sturdy, self-reliant, ambitious and patriotic; it would increase the ability of our producers and manufacturers to compete successfully for the world's trade; it would place American goods of all kinds in foreign markets to an extent bevond our most sanguine expectations, and that without curtailing the requirements of an ambitious, advancing American citizenship; it would be a section of an Interstate Commerce Law that could never be repealed, nor become the sport of parties or men for political purposes in the promotion of selfish ends. The National government should, without delay, enter upon this great work, the commercial and military importance of which can hardly be exaggerated. A ship waterway, free from foreign control, from the Gulf of Mexico to the chain of Great Lakes and thence to the Atlantic Ocean was the plan for internal transportation and national defense foreshadowed by the genius and statesmanship of Albert Gallatin, De Witt Clinton and Robert Morris, whose grand and audacious sagacity comprehended the whole country and who saw with prophetic vision the splendid possibilities of the untrod regions which to-day are the wonder of the world.

Cordially conveying to you the expression of my highest esteem,

I am, very respectfully,

GEORGE F. STONE,

Secretary.

I desire to express my indebtedness to Messrs. Howard. Bartels & Company. Chicago; Hon. O. P. Austin, Chief Bureau of Statistics, United States Treasury Department; Hon. John Hyde, Statistician United States Department of Agriculture; E. E. Hooper, Esq., Secretary of the Lumbermen's Exchange of the City of Chicago; J. C. Brown. Esq., Statistician. New York Produce Exchange; J. F.Woffindin. Esq., Chairman Chicago Committee Central Traffic Association; Hon. Charles U. Gordon, Postmaster of the City of Chicago; C. B. Murray. Esq., Editor Cincinnati Price Current; Hon. Wm. Penn Nixon, Collector of Customs of the City of Chicago; Wm. B. Thornton, Esq., Chicago; J. L. Kellogg, Esq., Chicago; J. C. Denison, Esq., Secretary Union Stock Yards and Transit Company; Geo. J. S. Broomhall. Esq., Editor Liverpool Corn Trade News, Liverpool; F. E. Saward. Esq., Editor Coal Trade Journal, New York; Messrs. H. V. & H. W. Poor. New York City; Department of Public Works, Chicago; W. C. Gerrard, Esq., Secretary State Board of Agriculture, Springfield, Illinois; Isham Randolph. Engineer, Chicago Sanitary and Ship Canal.

REPORT OF THE BOARD OF DIRECTORS.

To the Members of the Board of Trade of the City of Chicago:

Gentlemen—Your Directory herewith submits the following report for the fiscal year ended January 8, 1900:

FINANCIAL STATEMENT OF THE BOARD OF TRADE OF THE CITY OF CHICAGO, FOR THE FISCAL YEAR ENDED JANUARY 8, 1900.

RECEIPTS.

From 1,831 Annual Assessments	\$109,860	00
From 165 transfers of Membership	4,125	00
From sales of Visitors' tickets	1,710	00
From sales of Messengers' tickets	1,532	50
From sales of Clerks' tickets\$1,730 00		
Less salary of Manager of Settling Room 900 00		
	830	
From sales of Messengers' and Samplers' badges		00
From table and drawer rentals	7,147	
From Weighmaster's Department	8,578	
From Board of Trade Clearing House	3,158	
From rentals and premiums Telephone Room G, Exchange Hall.	3,951

In hands of Transcriper		
In hands of Treasurer \$4,968 53		
Cash and vouchers in office		
\$5,787 59		
40,11.00		

LXXIV

LIABILITIES.

Chicago, January 9, 1900.

This is to certify that the foregoing statement of receipts and expenditures of the Board of Trade of the City of Chicago, for the fiscal year ended January 9, 1900, is true and correct. I have audited all the books of account, proved the record of receipts and disbursements, and examined all vouchers.

JOHN EVERETT, Secretary, THE AUDIT COMPANY OF CHICAGO.

CHICAGO, January 11, 1900.

The bonded indebtedness of the Board is \$1,240,000, bearing interest at the rate of 4 per cent. per annum, payable semi-annually, viz: June 1st and December 1st, respectively.

The amount of rental derived from the building during the year amounted to \$114,172.43, as compared with \$111,954.06 in 1898, and \$110,251.94 in 1897, \$109,395.16 in 1896, and \$106,-643.60 in 1895.

The membership of the Association numbers 1809. The number of memberships transferred during the year was 165, yielding a revenue of \$4,125.

The clearances of the Board of Trade Clearing House during the year amounted to \$58,366,800.51, and the balances to \$20,-597,677.54, as against \$75,050,396.89 and \$24,802,486.22, respectively, during the year 1898.

Expenditures of the Real Estate Department, exclusive of construction and insurance, amounted to \$44,885.59, as against \$48,191.06, during 1898.

The Real Estate Committee installed a system of telephones between offices throughout the building which has proved a success beyond our expectations, and has already enhanced the value of our offices.

The change of location of the Directors' rooms and the rooms for the committees of Arbitration and Appeal, thereby making valuable for rental the old rooms, and the fitting up of rooms now occupied by the Clearing House and by Churchill & Company, necessitated an expenditure, which is included in the con-

struction account, of \$5,932.62. In consequence of this change, the rental of the building is increased \$5,500.00 per annum.

During the year 1899 every office in the building was rented.

The Traffic Manager of the Freight Bureau has submitted his report, which covers the work of the Bureau during the year.

This work in part resulted in extra time being allowed by railroads to hay receivers in which to unload their hay. The bill introduced in the Illinois Senate permitting railroads to charge reasonable sum for the use of cars and giving a lien for such charges, was defeated by the efforts of the Chairman of the Transportation Committee and the Traffic Manager.

The Bureau has directed its attention to relief, through the Interstate Commerce Commission, from discriminations in railroad freight rates and has made good progress.

A decision has been rendered by the United States Commission in the export grain rate, preventing railroads from making a lower rate from the Mississippi to the Atlantic seaboard, than from Chicago.

Contention has been made for equal rates on grain and flour, whether for domestic or foreign consumption.

The conference of National Commercial organizations, held in Chicago on the 22d of last November, was attended by the Transportation Committee and the Traffic Manager, and a bill was approved, recommending amendments to the Interstate Commerce Law, and which upon report of the Transportation Committee was endorsed by the Directors. This bill is known as Senate Bill No. 1439 and is in the hands of the Senate Committee on Interstate Commerce.

The Transportation Committee has also filed a protest against a contemplated change in classification of baled hay and straw, in carloads, and it is hoped that the result of this protest will be of benefit to this important trade.

The Traffic Manager in his report, says that numerous opportunities have been offered from time to time which have enabled him to be of service to many individual members of the Board in the matters affecting the adjustment of their minor traffic affairs with the railroads.

LEGAL DEPARTMENT.

Early in January, 1899, in the proceedings instituted by the Attorney General at the instance of the Board, the question of the

constitutionality of the Act of 1897, authorizing the owners of elevators of Class A to warehouse their own grain, was argued and presented by the attorney of the Board to Judge Tuley for decision. Shortly after the case was taken under advisement by him a bill was introduced in the Legislature to repeal the Act of 1897. This bill passed the lower house, but towards the end of the session it was defeated in the Senate. It is probable that the introduction of this bill and the prospects for its passage are somewhat responsible for the delay in the decision of the Chancellor. The Directory has done all it consistently could to expedite a decision, and has hopes that one will soon be rendered.

The petition of H. H. Baumann, an expelled member, for a writ of *certiorari* to restore him to membership, was dismissed December 13, 1899, at the instance of the Board, and his attempt to secure restoration to membership through the courts has thus been frustrated.

The Chancery suits brought against the Board by Harry E. Wiley, Michael Commission Co., Union Deposit and Guaranty Company and Consolidated Produce & Stock Exchange, to prohibit the cutting off of their quotations, are still pending, as are also the two creditors' bills referred to in the last report, one by Louis Ritz and the other by Frederick W. Crosby against other parties jointly with this Board. In these last two suits the Board of Trade has no pecuniary interest and is but incidentally a party.

During the year the Supreme Court of the United States, in the suits brought by Messrs. Nicol, Nichols and Skillen, to test the validity of the stamp tax on sales made on the Board of Trade, were in April last decided adversely, which is much to be regretted on account of the discriminating and oppressive nature of this tax.

Through the efforts of two of our members, Messrs. Eschenburg & Dalton, a decision was obtained in December, 1899, from the U. S. Commissioner of Internal Revenue, that members of this Board, whose business it is to make in their own names (and not in that of their customers) contracts of purchase or sale for present or future delivery, are not as "Commercial brokers" required to pay the \$20.00 a year contemplated in the United States Revenue Act. The chances are good of securing the refunding to members of such taxes already paid by them, and arrangements have been made whereby members desiring to join in steps to get such taxes refunded may do so at a reasonable cost.

An unusual number of important legal questions have arisen during the year, requiring the careful consideration of your committee and the Attorney of the Board. The legal affairs of the Board have continued during the year and are now in a satisfactory condition.

Under instructions of the Association at its last annual meeting, to use every effort to suppress bucket shops and bucket shopping, a bucket-shop committee was appointed, and under its supervision \$6,371.80 was paid during the year, as against \$15,727.61 paid during 1898, \$19,720,61 during 1897, and \$13,838,10 paid during the year 1896. There was also paid out on this account during the last year \$1,800.00, this amount being left over from the year 1898.

The number of bucket-shop keepers prosecuted and indicted dur-		
ing the year		43
Number found guilty in Criminal Court and fined from \$200 to

Criminal Court		9
Number who have gone out of business through the instrumen-		
tality of investigations without prosecution		6

The year 1899 has been a banner year for the Weighing Department, during which time it has weighed 380,454 cars, or an average of 31,704 cars per month. It has also weighed 72,124,-524 bushels of grain, to and from vessels, and 76,888 bags of seed.

WEIGHING DEPARTMENT.

The Weighmaster, Mr. H. A. Foss, has investigated the methods, etc., of weighing at twenty-seven places, most of them being important eastern ports, and the invariable result has been to establish absolute proof of the superiority of the system of weighing practiced in this market.

Fees have been reduced at several elevators. Changes have been made whereby certificates are delivered to consignees much

more promptly and earlier than ever before, and complete records are kept of all leaks reported to and discovered by this department by a system of car blanks, which was introduced the first part of last year, and has been received with decided approval by shippers and receivers of grain. It has proved a most efficient manner of settling shortages, and the blank has been copied at several other terminal points.

The Board, through its Finance Committee, has purchased and retired \$10,000 of its 4 per cent. bonds.

The Board has allowed twenty-two members to withdraw from the Association and surrender their privileges of membership and has paid such retiring members the sum of \$19,800. Cash on hand, \$5,787.59. No bills unpaid.

The dues for the current fiscal year are fixed at \$50.00 per capita, as compared with \$60.00 in 1898 and 1899; \$70.00 in 1897; \$65.00 in 1896 and \$100.00 in 1895.

REPORT OF THE TREASURER.

To the President and Board of Directors of the Board of Trade of the City of Chicago:

Gentlemen—As Treasurer of the Board of Trade of the City of Chicago, from the 10th day of January, 1899, I beg to report that—

I had on hand January 10, 1899		98
year, January 8, 1900, both inclusive	288,090	74
	\$298,907	72
I have paid 733 checks drawn by the Secretary and duly countersigned, amounting to		19
Leaving a balance on hand at this date of	\$ 4,968	53

Respectfully submitted,

ERNEST A. HAMILL,

Treasurer.

Attest:

R. S. WORTHINGTON,

Assistant Secretary of the Board of Trade of the City of Chicago.

January 9, 1900.

INAUGURAL ADDRESS OF WM. S. WARREN, PRES'T.

Fellow Members of the Board of Trade:

I should be a churl indeed, if I were not grateful for, and a "cad" if I were not proud of, the great compliment you have paid me by electing me to the highest office within your gift. I assume its duties with the greatest diffidence and reluctance, with a deep sense of my limitations and deficiencies, and of the great responsibilities and difficulties inevitable in the administration of an organization where so many conflicting interests are centered.

It has been said that the Chicago Board of Trade is the greatest commercial organization in the world, that the total value of all commodities exchanged is greater, and that the daily fluctuations of our markets are watched by more people and directly affect greater numbers, than any other. This was once wholly true, and may be partially so now, but there is no denying the fact that we are retrograding, and have been for some years. How to arrive at the causes of our retrogression and what remedies to apply to check it, are the important questions of the hour. The preamble to our Rules and By-Laws reads as follows:

"The objects of the Association are: To maintain a Commercial Exchange; to promote uniformity in the customs and usages of merchants; to inculcate principles of justice and equity in trade; to facilitate the speedy adjustment of business disputes; to acquire and disseminate valuable commercial and economic information; and, generally, to secure to its members the benefits of co-operation in the furtherance of their legitimate pursuits."

Should we amend this by adding: "To grind out quotations for bucket shops," "to provide a medium for the collection of put and call money," and "to facilitate the gathering in of carrying charges by warehousemen four times yearly?" Candidly, are these not a large part of our occupation at present? Our principal trouble seems to be a lack of buyers for our wares, both for cash and future delivery. And why this lack of buyers? Partly from natural causes, but also because buyers have been discriminated against and legislated against for many years. Our system of long future

trading has driven all the capital in the grain trade into warehousing, and driven out all speculative support through sheer weight of almost ceaseless carrying charges year in and year out, owing to enormous artificially accumulated and tenaciously held stocks. combination of our present warehouse laws and only four deliveries yearly, is utterly incompatible with a broad speculative market, and events are proving it, and we all know that speculation is the very life-blood of the grain market. Our elevator friends should be as greatly interested as any of us, for when the speculative market is gone entirely, and their opportunity of hedging gone with it, they too will be seeking for new methods. Would not a shortening up in the periods of future trading help matters by compelling more frequent settling days, and a more equitable distribution of the burden of carrying charges? And would not general shipping business be stimulated by more frequent deliveries and the greater availability of cash property? I answer, yes, to both.

Our cash grain trade also has suffered through abuse of the practice of mixing grades of wheat and through the incompetence This seems to be true of many American of our State inspection. markets, but especially of Chicago. Within a twelve-month public meetings of grain merchants in England have been held to devise new methods of handling American grain, owing to the unreliable character of American grades and certificates, and bitter complaints have come to private individuals and to the officials of our Board. As recently as last Wednesday press cables from Marseilles stated that owing to dishonest grading at American Gulf ports that market would handle no more American wheat except on sample. was when under Chicago Board of Trade inspection our certificates passed current as money in any market of the world. time this question of dishonest grades received the overhauling it deserves, not only in Chicago but in other American grain markets. Should we not seek the means for restoring Chicago Board of Trade inspection in this market to replace the political machine? Witness, for example, the prompt response in the provision market to the recent reforms in inspection and the quality of contract property.

Privilege trading is not only illegal, but it is a great detriment to the market, inasmuch as it hampers fluctuations and thus helps smother speculation. I am aware that there is a great difference of honest opinion on the merits of this subject among us, but I think there should be none as to the propriety of suspending the practice until legal objections are removed either through legislation or the courts. The position in which nearly all commission houses place themselves through privilege trading would discredit a lot of school boys. Our attitude of suppressing this traffic in the lower corridor, but tolerating it on the Exchange floor, is ridiculous and reprehensible.

The bucket shop question is the same old sore as of old, and it is threshing old straw to go into it. The struggle against it must be kept up, but it seems unjust for our Board to go on spending their money fighting it single handed. Much more could be accomplished by co-operation with other Exchanges, which, in all fairness, should be ready and willing to assume their proper share of the burden, or by a less generous distribution of our quotations. But here, up to this time, unfortunately, the Courts seem to have completely headed National legislation is perhaps the only method of completely eradicating this evil. Bucket shop method within our own organization, as revealed by recent disclosures, is an even more insidious evil, and must be fought to the bitter end. have purged ourselves of contempt at the bar of public opinion we can more consistently combat evils outside.

The policy of retiring memberships pursued during the past year should be continued, and the conditions for admission of new members should be made more stringent. This is not a charity organization, and there is no reason why we should not require applicants to show that their acquisition will be of some value to the Board. Genuine and *permanent* reform can only come through elevating the character and responsibility of our membership and increasing the value of our certificates. "The stream can rise no higher than its source."

It is perhaps in questionable taste for your presiding officer to advance any proposals for changes in your rules, but as this subject has been uppermost in our minds for a long time without taking definite shape, I venture to offer a few suggestions as to amending of our Rules. These are only in the rough, and I recommend they be referred to a Committee of the full Board to complete, if they deem wise, and to draw up such others as they may consider necessary for the good of the organization, for submission to ballot of the Board:

Before limiting the period for future trading or enacting a new commission rule, we should make an earnest effort to secure cooperation by other important Exchanges for obvious reasons. But in case of failure to secure this we should not be turned from our purpose. I am aware that some of these proposed changes present grave perplexities and doubts as to their working out and their proper enforcement. I hope they will be freely discussed and acted upon deliberately and wisely. It is your part to enact measures, mine to carry them out.

Amend Rule 1, by providing that nominations for candidates for all elective offices shall be by ballot of the full Board. Vote to be taken three days before annual election.

In Section 8, Rule 4, make penalty expulsion and make it mandatory. This refers to bucket shop affiliations.

Revise Rule 14, Commission rule, and make penalty for violation expulsion and make it mandatory. Offer a standing reward of \$1,000 for conviction of any violation. We have made ourselves absurd and ridiculous and actually driven away business by offering to do it for nothing. The individual who holds himself too cheaply commands no respect but is rather regarded with suspicion, and it is the same with organizations. In the larger cities brokers who formerly sent large orders to our market have ceased to solicit grain business owing to its unprofitableness and confined their attention to other speculative commodities and to securities which pay an honest return for honest service.

Amend rules governing Clearing House so that all future contracts for delivery beyond the current or two following months, and all contracts growing out of privileges shall be debarred from the Clearing House, and, in the latter case, make proper penalties for violation.

Enact a rule prohibiting any member or firm from trading for the account of an employe of another firm when the employer's name appears in the transaction.

On behalf of your directors and officers I venture to hope for your earnest support and co-operation during the coming year. We have been wofully deficient in this in the past, and false ideas have taken root regarding the duties of members in reporting violation of rules, which have seriously interfered with proper discipline. When we witness irregularities without bringing the perpetrator to justice we become accessories to the act and are false to the organization and false to ourselves. This administration is committed to no interest, nor to any policy except to rigidly enforce your rules without fear or favor. The will of the majority of this Board is our will. Our sole aim will be the greatest good to the greatest number, and in so far as our ability lies every member of this Board will get all he is entitled to from the organization, but no more.

I beg your indulgence but a moment longer while I read a contract which bears the signature of every member of this Board. With many of us it was so long ago that we are liable to have forgotten it.

"We, the undersigned, members of the 'Board of Trade of the City of Chicago,' do, by our respective signatures and by virtue of our membership in said corporation, hereby mutually agree and coverant with each other, and with the said corporation, that we will in our actions and dealings with each other and the said corporation be in all respects governed by and respect the Rules, Regulations and By-laws of the said corporation, as they now exist, or as they may be hereafter modified, altered or amended."

Is there any reason in the world why we should not abide by this solemn compact, both in letter and spirit, just as rigidly as we live up to our *money* contracts? I think not.

Gentlemen, let us be true to our organization. Let us be true to each other. Above all, let us be true to ourselves.

ALL-RAIL THROUGH BUSINESS.

The following statement shows the quantity of flour and grain received at Chicago during 1899, by western railroads, and delivered to connecting lines without passing through a Chicago warehouse, as reported by such roads. These quantities are all included in the general statements of receipts and shipments published herewith, except shipments originating in Milwaukee; these are deducted from the receipts and shipments of Chicago, as shown by the general statements, but are included in this:

GRAIN INSPECTION.

Rules governing the Inspection of Grain in the City of Chicago, State of Illinois.

The following are the rules adopted by the Board of Railroad and Warehouse Commissioners establishing a proper number and standard of grades for the inspection of grain, as revised by them; the same to take effect on and after September 19, 1898, in lieu of all rules on the same subject heretofore existing:

RULE 1.—WINTER WHEAT.

White winter.

No. 1 white winter wheat shall be pure white winter wheat, or red and white mixed, sound, plump and well cleaned.

No. 2 white winter wheat shall be white winter wheat, or red and white mixed, sound and reasonably clean.

No. 3 white winter wheat shall include white winter wheat, or red and white mixed, not clean and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 white winter wheat shall include white winter wheat, damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

Long red.

No. 1 long red winter wheat shall be pure red winter wheat of the long-berried varieties; sound, plump and well cleaned.

No. 2 long red winter wheat shall be of the same varieties as No. 1; sound and reasonably clean.

Hard winter.

Hard winter wheat—The grades of Nos. 1, 2, 3 and 4 hard winter wheat shall correspond, in all respects, with the grades of Nos. 1, 2, 3, and 4 red winter wheat, except that they shall be of the Turkish variety.

In case of mixture of Turkish red winter wheat with red winter wheat it shall be graded according to the quality thereof and classed as hard winter wheat.

Red winter.

No. 1 red winter wheat shall be pure red winter wheat of both light and dark colors of the shorter-berried varieties; sound, plump and well cleaned.

No. 2 red winter wheat shall be red winter wheat of both light and dark colors; sound and reasonably clean.

No. 3 red winter wheat shall include red winter wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 red winter wheat shall include red winter wheat damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

Mixture

Red winter wheat containing a mixture not exceeding five per cent. of white winter wheat shall be classed as red winter wheat.

Red winter wheat containing more than five per cent. of white winter wheat shall be graded according to the quality thereof and classed as white winter wheat.

No. 1 Colorado wheat shall be sound, plump and well cleaned. Colcrado.

No. 2 Colorado wheat shall be sound, reasonably clean and of

good milling quality.

No. 3 Colorado wheat shall include Colorado wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

RULE II.—SPRING WHEAT.

No. 1 Northern spring wheat-must be northern grown spring Northern wheat, sound and reasonably clean, and of good milling quality, and must contain not less than fifty per cent. of the hard varieties of spring wheat.

No. 2 Northern spring wheat—must be northern grown spring wheat, not clean enough or sound enough for No. 1, and must contain not less than fifty per cent. of the hard varieties of spring wheat.

No. 1 spring wheat shall be sound, plump and well cleaned.

Spring wheat.

No. 2 spring wheat shall be sound, reasonably clean and of good milling quality.

No. 3 spring wheat shall include all inferior, shrunken or dirty spring wheat weighing not less than fifty-three pounds to the measured bushel.

No. 4 spring wheat shall include spring wheat damp, musty, grown, badly bleached, or for any cause which renders it unfit for No. 3.

White spring wheat—The grades of Nos. 1, 2, 3 and 4 white spring wheat shall correspond with the grades of Nos. 1, 2, 3 and 4 spring wheat, except that they shall be of the white variety, or shall contain five per cent., or more, of such white wheat.

Black Sea and Flinty Fife wheat shall in no case be inspected

higher than No. 2, and rice wheat no higher than No. 4.

Frosted wheat—shall in no case be graded higher than No. 4, except that the grade of No. 3 may contain as much of said frosted wheat as it is customary to allow of wheat damaged in any other way.

RULE II. - MIXED WHEAT.

The grades of Nos. 2 and 3 mixed wheat shall be equal in quality to the grades Nos. 2 and 3 red winter wheat; except that they shall include mixtures of spring and winter wheat.

RULE III.--CORN.

No. 1 yellow corn shall be yellow, sound, dry, plump and well Yellow. cleaned.

No. 2 yellow corn shall be three-fourths yellow, dry, reasonably clean, but not plump enough for No. 1.

No. 3 yellow corn shall be three-fourths yellow, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

No. 1 white corn shall be sound, dry and plump, and well cleaned. White.

No. 2 white corn shall be seven-eighths white, dry, reasonably clean, but not plump enough for No. 1.

No. 3 white corn shall be seven-eighths white, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.

- No. 1 corn shall be mixed corn of choice quality, sound, dry and well cleaned.
- No. 2. No. 2 corn shall be mixed corn, dry, reasonably clean, but not good enough for No. 1.
- No. 3 corn shall be mixed corn, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.
- No. 4 corn.—Corn that is badly damaged, damp or very dirty, shall be graded no higher than No. 4.

Corn that is wet or in heating condition shall not be graded.

RULE IV.—OATS.

White. No. 1 white oats shall be white, sound, clean and reasonably free from other grain.

No. 2 white oats shall be seven-eighths white, sweet, reasonably clean and reasonably free from other grain.

No. 3 white oats shall be seven-eighths white, but not sufficiently sound and clean for No. 2.

No. 4 white oats shall be seven-eighths white, damp, badly damaged, musty, or for any other cause unfit for No. 3.

- No. 1 oats shall be mixed oats, sound, clean and reasonably free from other grain.
- No. 2 oats shall be sweet, reasonably clean and reasonably free from other grain.
- No. 3 oats shall be mixed oats, not sufficiently sound and clean for No. 2.
- No. 4 oats shall be mixed oats that are damp, badly damaged, musty, or for any other cause unfit for No. 3.
- No. 1 white clipped oats shall be white, sound, clean, reasonably free from other grain, and shall weigh not less than thirty-six pounds to the measured bushel.
- No. 2 White clipped oats shall be seven-eighths white, sweet, reasonably clean, reasonably free from other grain, and shall weigh not less than thirty-four pounds to the measured bushel.
- No. 3 white clipped oats shall be seven-eighths white, not suffiwhite Clipped ciently sound or clean for No. 2, and shall weigh not less than twenty-eight pounds to the measured bushel.

RULE V.—RYE.

- No. 1. No. 1 rye shall be sound, plump and well cleaned.
- No. 2 rye shall be sound, reasonably clean and reasonably free from other grain.
- No. 3 rye shall be reasonably sound, reasonably dry, free from must, and not good enough for No. 2.
- No. 4 rye—All rye, damp, musty, or for any other cause unfit for No. 3.

RULE VI.-BARLEY.

No. 1 barley shall be sound, plump, bright, clean and free from No. 1. other grain.

No. 2 barley shall be of healthy color, not sound and not plump No. 2. enough for No. 1, reasonably clean and reasonably free from other grain.

No. 3 barley shall include slightly shrunken and otherwise No. 3. slightly damaged barley not good enough for No. 2.

No. 4 barley shall include all barley fit for malting purposes not No. 4. good enough for No. 3.

No. 5 barley shall include all barley which is badly damaged, or No. 5. from any cause unfit for malting purposes; except that barley which has been chemically treated shall not be graded at all.

The grades of Nos. 1, 2 and 3 Scotch barley shall correspond in Scotch all respects with the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Scotch variety.

The grades of Nos. 1, 2 and 3 Bay Brewing barley shall conform Bay Brewing in all respects to the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Bay Brewing variety grown in the Territories and on the Pacific coast.

The grades of Nos. 1, 2 and 3 Chevalier barley shall conform in Chevalier all respects to the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Chevalier variety grown in the Territories and on the Pacific coast.

RULE VII.

The word "new" shall be inserted in each certificate of inspection of a newly harvested crop of oats until the fifteenth day of August; of rye, until the first day of September; of wheat, until the first day of November, and of barley until the first day of May of each year.

This change shall be construed as establishing new grades for the times specified, to conform to the existing grades of grain in all particulars, excepting the distinctions hereby established between the new and the old crop, and shall apply to grain inspected from store for two months after the times respectively above specified.

RULE VIII.

All grain that is warm, or that is in a heating condition, or is otherwise unfit for warehousing, shall not be graded.

RULE IX.

All inspectors shall make their reasons for grading grain, when necessary, fully known by notations on their books. The weight alone shall not determine the grade.

RULE X.

Each inspector is required to ascertain the weight per measured bushel of each lot of wheat inspected by him and note the same on his book.

ADMINISTRATION AND WAREHOUSE REGISTRA-TION.

Extracts from the rules adopted by the Railroad and Warehouse Commissioners for the administration of the departments of grain inspection and warehouse registration in the city of Chicago in force from and after December 3, 1887.

"Plugged,"
"Loaded," or
"Scoured"
grain.

"The said Chief Inspector, and all persons inspecting grain under his direction, shall in no case make the grade of the grain above that of the poorest quality found in any lot of grain inspected, when it has evidently been "plugged," or otherwise improperly "loaded," for the purpose of deception. Wheat which has been subjected to "scouring," or to some process equivalent thereto, shall not be graded higher than No. 3."

Attempts at fraud, or interference.

"All persons employed in the inspection of grain shall promptly report to the Chief Inspector, in writing, all attempts to defraud the system of grain inspection established by law, and all instances where warehousemen shall deliver, or attempt to deliver, grain of a lower grade than that called for by the warehouse receipt."

"They shall also, in the same manner, report all attempts of receivers or shippers of grain, or any other person interested therein, to instruct, or in any improper way to influence the action or opinion of any inspector in the discharge of his duty; and the Chief Inspector shall report all such cases to the Commission."

Extracts from the Laws of Illinois, Revised Statutes, Chapter 114, Section 138:

"Any duly authorized Inspector of Grain who shall be guilty of neglect of duty, or who shall knowingly or carelessly inspect or grade any grain improperly, or who shall accept any money or other consideration, directly or indirectly, for any neglect of duty, or the improper performance of any duty, as Inspector of Grain, and any person who shall improperly influence any Inspector of Grain in the performance of his duties as such Inspector, shall be deemed guilty of a misdemeanor, and, on conviction, shall be fined in a sum of not less than \$100, nor more than \$1,000, in the discretion of the Court, or shall be imprisoned in the county jail not less than three, nor more than twelve months, or both, in the discretion of the Court."

INSPECTION AND WEIGHING RATES.

GRAIN (STATE INSPECTION). For inspecting grain from wagons, per load..... 10 For inspecting grain from canal-boats, per M bu..... 40 For inspecting grain to vessels, per M bu..... 50 For inspecting grain to cars, in bulk, per car..... 35 For inspecting grain to teams, per car.... 35 For inspecting grain to teams, per load..... 10 For inspecting grain in sacks, per bu..... 001/4 EDWIN J. COMMISSIONS.

The following rates of commission and brokerage, being just and reasonable, are hereby established as the minimum charges which shall be made for the transaction of the business hereinafter specified, by members of this Association: For receiving, selling and accounting for the following kinds of property—

For the sale of property on consignment:

Wheat, rye and barley, by car-load lots, in store, free on board cars or vessels, on track, delivered or to be shipped from any
other pointper bu. \$0.01
Corn, by car-load lots, in store " 00½
For selling corn, otherwise than in store " 00½
Oats by car-load lots " 00½
For selling canal-boat loads of grain in store, or afloat, or free on
board vessels
Flaxseed, in bulk
Flaxseed, in bags
Clover seed, in car-load lots
Clover seed, in less than car-load lots
Timothy seed
All other seeds, in bulk
Dressed hogs, in car-load lots
Dressed hogs, in less than car-load lots
Bran, shorts and millstuffs
Corn-meal
Broom-corn 00½ perlb.
Hay and straw, in car-loads containing 10 tons or less 5 00 per car
Hay and straw, in cars containing more than 10 tons 500 per car
per ton
For the purchase and shipment of property:
Rye and barley, to be shipped by vessel cargo
For the purchase and sale of property in the Chicago market:
Grain of all kinds, in lots of 1,000 and 5,000 bushelsper bu. $\$000\frac{1}{5}$ Lard, in lots of 50 and 250 tiercesper tce. 05 Mess pork, in lots of 50 and 250 barrelsper brl. 05 Other meats, in lots of 25,000 and 50,000 poundsper M lbs. 25
In cases where the transaction is made for members of the Board one-half the last-named schedule may be charged.
$Brokerage\ charges\ under\ limitations:$
On all kinds of grainper M bu.\$0 12½
On lardper tce. 00½
On mess pork
On other meats

CHICAGO ELEVATOR WAREHOUSES.

The following warehouses have been declared Regular Warehouses for the storage of grain and flaxseed under the rules of the Board of Trade of the City of Chicago and the regulations and requirements of its Board of Directors, until the first day of July, 1900.

Name of Warehouse.	Date made Regular.	Operated by	Capacity. Bushels.
Alton and Alton B Elevator Armour Elevator, comprising	June 27, 1899	George A. Seaverns	1,850,000
Houses A, B and B Annex	June 27, 1899	Armour Elevator Co	5,000,000

Peavey Elevator B	Dec. 19, 1899	Peavey Elevator Co	1,750,000
Rock Island Elevator A		Charles Counselman & Co	1,000,000
South Chi. Elev. C and Annex.		South Chicago Elevator Co	2,500,000
Union Elevator		Chicago R'y Terminal Elev. Co	2,000,000
Wabash Elevator	Sept. 26, 1899	Chicago Elevator Co	1,500,000
Total capacity			28,400,000

GRAIN STORAGE RATES FOR 1899.

On all grain and flaxseed received in bulk and inspected in good condition, three-quarters (%) of one (1) cent per bushel for the first ten (10) days or part thereof, and one-fourth (%) of one (1) cent per bushel for each additional ten (10) days or part thereof so long as it remains in good condition.

On grain damp or liable to early damage as indicated by its inspection when received, two (2) cents per bushel for the first ten (10) days or part thereof, and one-half (½) of one (1 cent per bushel for each additional five (5) days or part thereof.

No grain will be received in store until it has been inspected and graded by authorized nspectors, unless by special agreement.

GRAIN INSPECTION.

Number of cars inspected in, by months, during 1899.

NOTE.—Prior to the year 1820 no official records of the arrival of alien passengers were kept. It is estimated, however, that the total number arriving in the United States from the foundation of the government to the year 1820 was 250,000.

Up to the year 1856 no record was kept of immigrants in distinction from the arrival of

Note.—Up to 1850 only the aggregate valuations in the several counties were reported to the State officers, and from 1852 to 1857, inclusive, a few counties returned only the aggregates; hence the details of real estate and personal property valuations are not complete for those years. In 1867 and 1868 the details of valuation are not entirely correct, owing to changes by the operation of the equalization law. Since 1868 the valuations are as equalized. The total valuations in each of the several years are correct and official.

The valuations for 1873 as equalized are largely in excess of any previous year. In 1874 some changes were made in the manner of equalizing the assessments, resulting in reducing all the valuations, especially those of railroad property.

The State debt, as noted, represents it as it stood on the 1st of January in each of the several years to 1869; in 1869 and 1870, as it stood December 1; in 1871, as it stood December 31; from 1872 to 1879, as it stood December 1.

CHICAGO REAL ESTATE AND PERSONAL PROPERTY.

Valuation for purposes of taxation, also the taxes levied, and the public debt of the city in each year since 1857.

Note.—From 1857 to 1862, inclusive, a lump tax of half a mill to two mills was levied on certain portions of the city, and is inclusive; and on above total tax. The city debt as noted represents it as it stood on February 1 in 1857 to 1864, inclusive; on April 1 in 1862 to 1874, inclusive; and on December 31, since 1874. Valuations from 1875 to 1883, inclusive, are by the county assessment, as equalized by the State Board of Equalization, and in some of these years do not include rallroad property. The city tax on rallroad property for 1882 and 1883, something over \$100,000 for each year, is not included in the above total tax. The above figures for 1889 include the districts annexed to the city of Chicago July 15 of that year.

ILLINOIS CENTRAL RAILROAD.

The following official table shows the amount of gross receipts of the Illinois Central Railroad since its completion to October 31, 1899, and the amount of tax paid into the State Treasury in accordance with the provisions of its charter:

FOREIGN WEIGHTS AND MEASURES.

(Furnished by the Board's special foreign correspondent, Mr. George J. S. Broomhall, Fellow of the Royal Statistical Society).

UNITED KINGDOM.

In the United Kingdom the quarter comprises among others the following conventional

${f L}{f b}$	S
Wheat and Corn from the Atlantic and Gulf ports of America, from Argentina,	
Australia and New Zealand 48	
American and Canadian Oats	
Californian Wheat	
Californian Barley44	
Russian Wheat from Brack Sea and Azoff, nearly always	12
Russian Wheat from Baltic	
Russian Corn from Black Sea	12
Russian Barley from Black Sea and Azoff	Ю
Russian Oats	0
Russian Rye	30
Danubian Wheat 48	30
Danubian Corn-large berry	30
Danubian Corn - small berry49)2
Danubian Barley 40	90
Danubian Rve	30
German Wheat, from Dantzic—500 lbs., all others	
Chilian Barley44	8
Chilian Wheat)()
New Zealand Oats cif. 320 on Mark Lane	34
Linseed, American 42	24
Linseed, Russian 42	34
Linseed, Argentine	6
Linseed, Bombay 41	6
Linseed. Calcutta	LO

ENGLAND.

The term bushel, used colloquially, varies greatly according to locality, from 32 lbs. to 160 lbs.

The Board of Agriculture reckons a bushel of wheat as equal to 60 lbs., of barley equal to 50 lbs., of oats equal to 39 lbs.

A sack or coomb usually represents 4 bushels.

A sack of flour contains 280 lbs.

SCOTLAND AND IRELAND.

A boll or bole is equal to 4 Winchester bushels. In Glasgow a boll represents 240 lbs. of wheat, 280 lbs corn and peas, 264 lbs. barley.

A Wey is equal to 5 quarters, a Last to 10 quarters.

Some of the principal weights and measures in use in the grain trade of other countries re:-

THE METRIC SYSTEM.

Weights.—A kilogramme (or kilo) is equal to 2 lbs. 3 oz. 4.383 drams.

A quintal (100 kilos) is equal to 220.4621 lbs. avoirdupois.

A French tonne (10 quintals or 1000 kilos) is equal to 2204.621 lbs. avoirdupois.

DRY MEASURE.—A hectoliter is equal to 2.837 Winchester bushels; 2.751 Imperial bushels.

SURFACE MEASURE—A hectare is equal to 2.47255 English statute acres.

Long Measure.—A meter is equal to 1 yard, 3.37079 inches.

A kilometer is equal to 1,093 yards, 1 foot, 10.79 inches.

RUSSIA.

A pood is equal to 36 lbs. avoirdupois.

A schetvert is equal to 5.77 Imperial bushels or 5.95 Winchester bushels.

A description of the control of the cont

A verste is equal to 0.663 of an English mile.

FOREIGN WEIGHTS AND MEASURES-CONTINUED.

AUSTRO-HUNGARY.

A joch is equal to 1.42521 acres.

A double centner is equal to a quintal 220.4 lbs.

DENMARK.

A Tönde is equal to 3.8 Imperial bushels or 3.917 Winchester bushels. A Pund is equal to 1.102 lbs., avoirdupois. A Töndeland is equal to 1.36 acres.

GREECE.

An ocque is equal to 2.84 lbs. avoirdupois.

A quintal is equal to 123.2 lbs.

EGYPT.

An oke is equal to 2.75136 lbs. avoirdupois. A cantar is equal to 99.05 lbs. avoirdupois. An ardeb of wheat or corn is equal to 118 okes or 324.6 lbs. avoirdupois. An ardeb of barley is equal to 88 okes or 242.6 lbs. avoirdupois.

CHINA.

A catty is equal to 1.33 lbs. avoirdupois.

A picul is equal to 1331/3 lbs. avoirdupois.

JAPAN.

A Schô is equal to 2.4507 acres. A kokow is equal to 5.1179 Winchester bushels or 4.9629 Imperial bushels. A kwan is equal to 8.2817 lbs. avoirdupois.

UNITED STATES TARIFF DUTIES.

Note—The area details are those of the British Board of Agriculture, the acreage yield since 1884 also being official, prior to 1884 the yields were estimated by the "Times" Commissioner and other anthorities. The imports and exports are the official returns issued by the "Customs." The population estimates are from the statistical abstract of the United Kingdom Flour is converted at the rate of 70 per cent. The rate of consumption for human food is reckoned at 5½ bu, per capita until 1880-81; since that dute at 5½ bushels. The bushel is the Imperial measure.

ANNUAL IMPORTS INTO THE UNITED KINGDOM.

An official return of the direct imports from foreign countries of Wheat, Maize, Barley,
Oats and Wheaten Flour into each port of the United Kingdom during
the calendar year 1899 and preceding four years.

(Furnished by the Board's special foreign correspondent, Mr. George J. S.Broomhall, Fellow of the Royal Statistical Society.)

FOREIGN WEIGHTS AND MEASURES, WITH AMERICAN EQUIVALENTS.

The following table embraces only such weights and measures as are given from time to time in consular reports and in the course of commercial relations.

Denominations.	Where used.	American equivalents.
Almude	Portugal	4.422 gallons.
Ardeb	Egypt	7.6907 bushels.
Are	Metric	0.02471 acre.
Arobe	Paraguay	25 pounds.
Arratel or libra	Portugal	1.011 pounds.
Arroba (dry)	Argentine Republic	25.3175 pounds.
Arroba (dry)	Brazil	32.38 pounds.
Arroba (dry)	Cuba	25.3664 pounds.
Arroba (dry)	Portugal	32.38 pounds.
Arroba (dry)	Spain Venezuela	25.36 pounds. 25.4024 pounds.
Arroba (dry)	Cuba, Spain and Venezuela	4.263 gallons.
Arshine	Russia	28 inches.
Arshine (square)	Russia	5.44 square feet.
Artel	Morocco	1.12 pounds.
Baril	Argentine Republic and Mexico	20.0787 gallons.
Barrel	Malta (customs:	
Barrel	Spain (raisins)	100 pounds.
Berkovets	Russia	361.12 pounds.
Bongkal	India	832 grains.
Bouw	Sumatra	7,096.5 square meters.
Bu	Japan	0.1 inch.
Butt (wine)	Spain	140 gallons.
Caffiso	Malta	5.4 gallons.
Candy Candy	India (Bombay)	529 pounds. 500 pounds.
Cantar	Morocco	113 pounds.
Cantar	Syria (Damascus)	575 pounds.
Cantar	Turkey	124.7036 pounds.
Cantaro (cantar)	Malta	175 pounds.
Carga	Mexico and Salvador	300 pounds.
Catty	China	1.333¼ (1¼) pounds.
Catty*	Japan.	1.31 pounds.
Catty	Java, Siam and Malacca	1.35 pounds. 2.12 pounds.
Catty Centaro	Central America	4.2631 gallons.
Centner	Bremen and Brunswick	117.5 pounds
Centner	Darmstadt	110.24 pounds.
Centner	Denmark and Norway	110.11 pounds.
Centner	Nuremberg	112.43 pounds.
Centner	Prussia	113.44 pounds.
Centner	Sweden	93.7 pounds.
Centner	Vienna	123.5 pounds.
Centner	Zollverein	110.24 pounds. 220.46 pounds.
Centner Chih	China	220.40 pounds. 14 inches.
Coyan	Sarawak	3.098 pounds.
Coyan	Siam (Koyan)	2,667 pounds.
Cuadra	Argentine Republic	4.2 acres.
Cuadra	Paraguay	78.9 yards.
Cuadra	Paraguay (square)	8.077 square feet.
Cuadra	Uruguay	Nearly 2 acres.
Cubic meter	Metric	35.3 cubic feet.
Cwt. (hundredweight)	British	
Dessiatine	Spain	1 11 11 11 11 11 11 11 11 11 11 11 11 1
Drachme	Greece	Half ounce.
Fanega (dry)	Central America	1.5745 bushels.
Fanega (dry)	Chile	2.575 bushels.
Fanega (dry)	Cuba	1.599 bushels.
Fanega (dry)	Mexico	1.54728 bushels.
Fanega (dry)	Morocco.	Strike fanega, 70 pounds. Full fanega, 118 pounds.
_		Full fanega, 118 pounds.
Fanega (dry)	Uruguay (double)	7.776 bushels.
Fanega (dry)	Uruguay (single) Venezuela	
k'anega (drvi)		
Fanega (dry) Fanega (liquid)		16 gallons

^{*}More frequently called "kin." Among merchants in the treaty ports it equals 1.331% pounds avoirdupois.

Metric Weights and Measures.

METRIC WEIGHTS.

METRIC WEIGHTS.

Milligram (0.001 gram) equals 0.0154 grain.
Centigram (0.01 gram) equals 0.1543 grain.
Decigram (0.1 gram) equals 1.5432 grains.
Gram equals 15.432 grains.
Decagram (10 grams) equals 0.3527 ounce.
Hectogram (1000 grams) equals 3.5274 ounces.
Kilogram (1,000 grams) equals 2.2046 pounds.
Myriagram (10,000 grams) equals 22.046 pounds.
Quintal (100,000 grams) equals 220.46 pounds.
Millier or tonnea—ton (1,000,000 grams) equals 2,204.6 pounds.

METRIC DRY MEASURES.

Milliliter (0.001 liter) equals 0.061 cubic inch. Centiliter (0.01 liter) equals 0.6102 cubic inch. Deciliter (0.1 liter) equals 6.1022 cubic inches. Liter equals 0.908 quart. Decaliter (10 liters) equals 9.08 quarts. Hectoliter (100 liters) equals 2.838 bushels. Kiloliter (1,000 liters) equals 1.308 cubic yards.

METRIC LIQUID MEASURES.

Milliliter (0.001 liter) equals 0.0388 fluid ounce. Centiliter (0.01 liter) equals 0.338 fluid ounce.

Deciliter (0.1 liter) equals 0.845 gill. Liter equals 1.0567 quarts. Decaliter (10 liters) equals 2.6418 gallons. Hectoliter (100 liters) equals 26.417 gallons. Kiloliter (1,000 liters) equals 264.18 gallons.

METRIC MEASURES OF LENGTH.

Millimeter (0.001 meter) equals 0.0394 inch. Centimeter (0.001 meter) equals 0.3937 inch.
Decimeter (0.11 meter) equals 3.937 inches.
Meter equals 39.37 inches,
Decameter (10 meters) equals 393.7 inches.
Hectometer (100 meters) equals 328 feet 1 inch.
Kilometer (1,000 meters) equals 0.62137 mile
(3,280 feet 10 inches). Myriameter (10,000 meters) equals 6.2137 miles.

METRIC SURFACE MEASURES.

Centare (1 square meter) equals 1,550 square inches. Are (100 square meters) equals 119.6 square yards. Hectare (10,000 square meters) equals 2.471 acres.
